- Helen Vine Recovery Month Celebration – 9/25 @ 5-8pm
- California's Transition to American Society of Addiction Medicine (ASAM) 4<sup>th</sup> Edition
- FY 2025-26 Data Highlights

A poster for a "Recovery Celebration" event. The background is a vibrant field of orange and yellow poppies. A purple diagonal banner in the top left corner reads "FREE EVENT". The main title "Recovery Celebration" is in a large, orange, serif font. Below it, in a smaller purple font, are the words "BBQ • MUSIC • RAFFLE • RESOURCES". The date and time "Friday, September 25th 5-8 pm" are in orange, followed by the location "San Rafael Community Center • 618 B Street, San Rafael" in black. The poster is divided into two columns. The left column is titled "Celebrate Your Journey" in orange, with text about enjoying BBQ, music, and community, and a call to action "Will you be there? RSVP: Development@Buokelew.org". The right column is titled "Welcome Community Partners" in orange, with text about reserving tables and sharing information, and contact details "JennaK@Buokelew.org, 415.720.2029 by Wednesday, September 16th". At the bottom, it says "Questions? Call 415.720.2029". The footer includes "Sponsored by:" followed by the "Buckelew Programs" logo and the "MARIN HEALTH & HUMAN SERVICES" logo with the tagline "Health, Well-being & Safety".

# FY 2025-26 System of Care Data - Who We Served

# FY 2025-26 CalOMS Data – Key Takeaways

- ✓ Hispanic/Latinx clients showed consistently stronger outcomes across the three measures examined by race/ethnicity — positive discharge, housing, and employment — a notable finding compared with patterns typically observed across the system of care.
- ✓ Black/African-American clients had the lowest positive outcomes across those same three measures, with the largest disparity appearing in positive discharge outcomes.
- ✓ Employment and positive discharge remain key opportunities for improvement systemwide, particularly when viewed alongside differences across demographic groups.
- ✓ Strong positive outcomes related to reductions in Emergency Department visits and justice involvement
- ✓ Average length of stay has declined substantially, from approximately 117 days in FY23–24 to 63 days in FY25–26, warranting further exploration of what is driving the change.

***Note: Data reflects individuals who were discharged from treatment in FY 2025-26***
