1.0 SUMMARY

Cameron-Cole, LLC (Cameron-Cole) has completed a Phase I Environmental Site Assessment (ESA) of the approximately 16-acre property located at southwest corner of parcel 018-152-12 along Sir Francis Drake Boulevard in San Quentin, Marin County, California, hereinafter referred to as the "property" or "subject property". The assessment was performed in accordance with the Master Agreement for Environmental Engineering Consulting Services between Cameron-Cole, LLC and First Carbon Solutions (FCS) International Inc., and Cameron-Cole's proposal dated June 20, 2022. and authorized by FCS on June 20, 2022. The scope of services generally conforms to the scope and limitations of the American Society for Testing and Materials International (ASTM International) Standard Practice for Environmental Site Assessments, Designation: E1527-21. The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the ASTM International Standard E1527-21, recognized environmental conditions (RECs) in connection with the subject property.

The subject property consists of a section of a parcel of land comprising a total of approximately 16 acres. The property located along Sir Francis Drake Boulevard is identified, by the Marin County as assessor parcel number (APN) 018-152-12 and is currently owned by the State of California. The subject property consists of a section of the parcel along the southwest corner of the parcel. A separate APN has not been assigned to the property. The subject property is located at the base of a primarily undeveloped hill that is sloping toward the south southwest and the San Francisco Bay.

In the 1970s, the subject property was formerly a gun range used by San Quentin State Penitentiary. The gun range is currently no longer in use and the subject property is currently covered in thick brush, grasses, shrubs, and trees. A small, paved lot is located at the gated entrance along Sir Francis Drake Boulevard, near Drake Cove Road. The remaining remnant of the gun range is a concrete wall near the southeastern side of the subject property. A concrete bunker, associated with the gun range, is located uphill and outside of the subject property. The gun range layout was such that ammunition was fired northward toward the hillside. No known remediation efforts have taken place at the property.

In October 1983, the State of California entered in an easement agreement with the Central Marin Sanitation Agency (CMSA) for the installation of a wastewater pipeline to be installed. The pipeline runs in a southwest-northeast direction, entering the property at the southwest corner, near Sir Francis Drake Boulevard. At this corner, a hydrogen peroxide odor control facility was built at the sewage junction pad in 1995 as part of the easement agreement.

The goal of this Phase I ESA is to identify the presence or likely presence of hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a future release of any hazardous substances or petroleum products in, on or, at a property. The findings of this report are summarized below and may include known or suspect RECs, controlled RECs (CRECs), historical RECs (HRECs), or *de minimis* conditions identified during the performance of this Phase I ESA.

- The historical use of the subject property was a gun range for San Quentin State Penitentiary. Lead ammunition is commonly use in firearms. No known remediation efforts have taken place on the subject property.

- A hydrogen peroxide injection system was added the CMSA sewer easement to aid in odor control of the sewer system. A sewer junction structure is present on the subject property.

- According to the Envirosite Report, there are eleven RCRA-LQG sites located within the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are three RCRA-NONGEN sites located within the AMSD of the subject property, but not including the subject property.

- According to the Envirosite Report, there is one RCRA-SQG/VSQG sites located within the AMSD of the subject property, but not including the subject property.

- According to the Envirosite Report, there are twelve ENVIROSTOR - CA sites located within the AMSD of the subject property, but not including the subject property.

- According to the Envirosite Report, there are two SWRCY sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one ALT FURLING sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are four DEBRIS EPA SWRCY sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one MANIFEST EPA site located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one RMP site located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are four DEBRIS EPA SWRCY sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are eleven CALEPA SITES - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are four FA 2 -CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are eleven HAZNET - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one HIGH FIRE - CA site located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are two HWP - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are two HWT - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are two LDS - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are one NFA - CA sites located with the AMSD of the subject property, not including the subject property.

With reference to these findings, the following Opinions are provided in connection with this assessment.

- The subject property was historically used as a gun range for San Quentin State Penitentiary. Due to the use of lead ammunition and lack of known remediation efforts, it is assumed that lead is still present in the soil. Based on this information, in the opinion of Cameron-Cole, the likelihood of lead contamination in the soil does constitute a REC as defined by the applicable standard.

- According to the Envirosite Report, there are two HIST AST - CA sites located within the AMSD of the subject property, not including the subject property. No violations were identified for either facility in connection with this database listing. Based on this information, in the opinion of Cameron-Cole, the identified HIST AST - CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are two HIST AST - CA sites located within the AMSD of the subject property, not including the subject property. No violations were identified for either facility in connection with this database listing. Based on this information, in the opinion of Cameron-Cole, the identified HIST AST - CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are two HIST UST - CA sites located within the AMSD of the subject property, but not including the subject property. No violations were identified for this facility in connection with this database listing. Based on this information, in the opinion of Cameron-Cole, the identified HIST UST - CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are twelve Envirostar – CA sites located within the AMSD of the subject property, but not including the subject property. No violations were identified for either facility in connection with this database listing. Based on this information, in the opinion of Cameron-Cole, the identified Envirostar – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are eleven HWG – CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified HWG – CA sites does not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there is one RCRA_SQG site located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified RCRA_SQG site does not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there is one RCRA_LQG site located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified RCRA_LQG site does not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are eleven CALEPA SITES – CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified CALEPA SITES – CA sites do not constitute a REC in connection with the subject property as defined by the

applicable standard.

- According to the Envirosite Report, there are four HIGH FIRE – CA/FIRE AREAS – CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified HIGH FIRE – CA/FIRE AREAS – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are four HAZNET - CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified HAZNET - CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are four MANIFEST EPA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified MANIFEST EPA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there is one NFA – CA site located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified NFA – CA site does not constitute a REC in connection with the subject property as defined by the applicable standard.

In summary, Cameron-Cole has performed the Phase I Environmental Site Assessment, in general conformance with the scope and limitations of ASTM International Standard E1527-21, for the property located at the southwest corner of parcel 018-152-12 along Sir Francis Drake Boulevard in San Quentin, Marin County, California the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report.

This assessment has revealed evidence of RECs in connection with the subject property.

This summary does not contain all the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

2.0 INTRODUCTION

2.1 Purpose

Cameron-Cole performed a Phase I ESA for an approximately 16-acre property located at southwest corner of parcel 018-152-12 along Sir Francis Drake Boulevard in the unincorporated area of San Quentin in Marin County, California. The assessment was conducted in accordance with the Master Agreement for Environmental Engineering Consulting Services between Cameron-Cole, LLC and First Carbon Solutions (FCS), (the Client). The subject property consists of a section of a parcel of land comprising a total of approximately 16 acres. The property is identified by the Marin County Assessor's Office as Assessor Parcel Numbers (APNs) 018-152-12. The subject property does not have an associated street address. The assessment was conducted in general conformance with the ASTM International Standard E1527-21 Standard Practice for Environmental Site Assessments. This ESA was designed to identify, to the extent feasible, the presence or likely presence of RECs in connection with the property.

The purpose of this Phase I ESA is to allow the "User" to benefit from one of the defenses referenced in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability: the innocent landowner defense, the contiguous property owner defense, or bona fide prospective purchaser defense. These defenses are collectively referred to as the "landowner liability protections," or "LLPs". ASTM International Standard E1527-21 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B). Cameron-Cole considers the FCS to be the "Client" and Mr. Teddy Newmyer, Associate Director of Real Estate Development, Eden House to be the "User" of this report.

The goal of this Phase I ESA is to identify RECs in connection with the subject property consistent with ASTM International Standard E1527-21. A REC is defined as:

> *The presence or likely presence of any hazardous substance or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*

2.2 Detailed Scope of Services

This Phase I ESA was conducted in accordance with the Master Agreement for Environmental Engineering Consulting Services between Cameron-Cole, LLC and First Carbon Solutions (FCS) as authorized by FCS on June 20, 2022. The scope of services consists of completing a Phase I ESA in general accordance with the requirements of the ASTM International Standard E1527-21 and the Scope of Services specified in the Master Agreement.

2.3 Significant Assumptions

Historical resources, personal interviews, and federal and state agency files regarding site operations and past historical use have been taken into account when presenting Cameron-Cole's findings and opinions. Cameron-Cole considers all information provided by our environmental database subcontractor regarding regulatory status of facilities to be current, accurate, and complete. Although Cameron-Cole made no independent investigation as to the accuracy and completeness of other information derived from secondary sources, Cameron-Cole assumes such information is reliable and representative of site conditions.

2.4 Limitations and Exceptions of Assessment

2.4.1 Site-Specific Limitations

Subsurface investigations were not conducted as part of this assessment. The interiors of several locked garages on the subject property were not observed and contents were not disclosed. No other site-specific limitations were encountered during the site reconnaissance.

2.4.2 Data Gaps

A data gap is a lack of or inability to obtain information required by ASTM International Standard E1527-21 despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by ASTM International Standard E1527-21, including but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the Key Site Manager, regulatory officials, etc.). However, according to the ASTM International Standard Practice E1527-21, data gaps are only significant if "other information and/or professional experience raise reasonable concerns involving the data gap". In the opinion of Cameron-Cole, no significant data gaps were encountered during the completion of this Phase I ESA.

2.4.3 General Limitations and Exceptions

The Phase I ESA is produced in accordance with customary principles and practices in the applicable fields of environmental science and engineering. Cameron-Cole is not responsible for conclusions, opinions, or recommendations made by others based upon the information presented herein.

Although industry standard practices are employed, Phase I ESAs are inherently limited, given that findings and conclusions are developed from limited site evaluation and research. In performing a Phase I ESA, Cameron-Cole can only rely upon those records regarding the subject property and surrounding properties which are available to the public and which can reasonably be obtained by Cameron-Cole. Cameron-Cole's opinions, conclusions and recommendations are therefore limited to those which can be derived from such available and reasonably obtainable records. It is often necessary for Cameron-Cole to rely on information prepared or obtained by others in order to complete the Phase I ESA. Cameron-Cole makes no warranty or representation as to the accuracy or completeness of information obtained from third parties. Additionally, changes may result with the passage of time with respect to characteristics of the subject property and those of surrounding properties. Cameron-Cole and its representatives do not warrant for or against future changes in operations or conditions, nor do they warrant for or against conditions present of a type or at a location not specifically addressed in the Phase I ESA.

Subject to the limitations stated herein, the opinions presented in the Phase I ESA are valid for a period of 90 days from the date of issuance.

Air, soil, and groundwater testing are not part of the Phase I ESA Report. This Phase I ESA is not intended to establish whether air, soil, or groundwater contamination, or waste disposal is actually present or not present on the subject property or on surrounding properties. Knowledge of actual environmental conditions on the subject property or on any surrounding properties can only be obtained from air, soil, and groundwater testing, the installation of groundwater monitoring wells, and possibly additional testing, all of which are outside the scope of the Phase I ESA.

Reasonable efforts were made within the scope of the Phase I ESA to identify the presence of underground storage tanks (USTs), aboveground storage tanks (ASTs), and ancillary equipment on or near the subject property. Limitations to the Phase I ESA exist with regard to USTs and ASTs, in as much as information was obtained by Cameron-Cole solely through its review of unobstructed and readily accessible areas, database information, and interviews. Such methods (which are considered industry standard) do not preclude the actual presence of subsurface equipment (including USTs) or regulated materials that are hidden from view due to historical activity such as site paving, re-grading, construction, or debris pile storage. Similarly, it is possible that additional UST facilities not listed in regulatory database files may exist at the subject property or on properties adjacent to the subject property due to owner/operator registration negligence, filing errors with the state regulatory agency or other reasons over which Cameron-Cole has no control or ability to determine.

Conclusions in the Phase I ESA regarding potential environmental impact of properties and facilities surrounding the subject property are based upon reasonably available information obtained from environmental databases and inferred groundwater flow direction. Actual groundwater conditions on the subject property, including flow direction, can only be definitively ascertained through the installation and gauging of at least three on-site groundwater monitoring wells, which is outside the scope of a Phase I ESA.

No environmental assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of a Phase I ESA is solely intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property, and this practice recognizes reasonable limits of time and cost. The Phase I ESA has been prepared for the exclusive use and benefit of FCS subject to the terms and conditions specified in the Master Agreement for Environmental Engineering Consulting Services between Cameron-Cole, LLC and FCS. The Phase I ESA is for the sole and exclusive use and benefit of FCS, our Client. Cameron-Cole makes no warranty as to the Phase I ESA except as to FCS's exclusive use of the Phase I ESA. The Client bears the sole responsibility for ensuring that the Phase I ESA is distributed or disseminated to only those third parties to whom FCS is strictly obligated by contract, law, regulation, or ordinance to provide it. Cameron-Cole disclaims any and all liability to any person or entity other than FCS who uses or relies on the Phase I ESA in any way whatsoever without the express written consent of both FCS, and Cameron-Cole.

Third-party reliance letters may be issued upon request and upon payment of the then current fee for such letters, and only if both FCS and Cameron-Cole provide express written consent for any such reliance letters.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The subject property consists of a section of a parcel of land comprising a of approximately 16 acres. The subject property does not have a physical address but is located on the southwest corner of the parcel along Sir Francis Drake Boulevard. A Site Location Map is provided as Figure 1. According to the June 2022 Chain Search performed by The Fox Group, the entire parcel 018-152-12, including the subject property, is currently owned by the State of California.

3.2 Site and Vicinity Characteristics

The subject property is comprised of a section of a parcel of land approximately 16 acres which is owned by the State of California, formerly a gun firing range operated by San Quentin State Penitentiary. The subject property is currently unoccupied and located along Sir Francis Drake Boulevard. The only structure on the subject property includes a fenced in sewer odor control facility which consists mainly of a large above ground tank and a concrete junction platform that is operated by Central Marin Sanitation Agency (CMSA) as part of an easement agreement. A paved lot is located near the gated entrance. The structures used for the firing range are no longer on the property with the exception of a remnant wall along the eastern boundary. The subject property at the time of the site reconnaissance, was heavily covered with bushes, shrubs, grasses, and trees. A homeless camp was observed in a concrete bunker located uphill from the firing range, along the northern boundary of the subject property. A Site Vicinity Map depicting the subject and adjoining properties is provided as Figure 2. Photographic documentation of the site and neighboring property conditions is presented in Appendix A, Photographs.

3.3 Current Uses of the Property

At the time of the site reconnaissance, the subject property is currently unused except for the CMSA easement structures.

3.4 Descriptions of Structures, Roads, and Other Improvements to the Site

The subject property can be accessed from the south along Sir Francis Drake Boulevard. A paved lot is located at the entrance of the property. A concrete sewer junction pad and odor control facility is located adjacent to the gated entrance along Sir Frances Drake boulevard. The property is primarily undeveloped.

3.5 Current Uses of Adjoining Properties

North: Primarily undeveloped land of the parcel with a cell tower at the top of the hill.

South: Sir Francis Drake Boulevard followed by Corte Madera Channel and San Francisco Bay.

East: Undeveloped land of the parcel followed by San Quentin State Penitentiary

West: Drakes Cove Housing development

4.0 USER PROVIDED INFORMATION

In order for the User to qualify for one of the LLPs offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, Section 6 of ASTM International Standard E1527-21 requires the User to provide the environmental professional the following information:

- The existence of environmental cleanup liens;
- Activity and Use Limitations (AULs) recorded against the subject property;
- Specialized knowledge or experience of the User;
- Relationship of the purchase price to the fair market value of the property if it were not contaminated;
- Commonly known or reasonably ascertainable information about the subject property; and
- The degree of obviousness of the presence of contamination at the subject property.

4.1 Title Records

A historical chain-of-title report was obtained by Cameron-Cole as part of he approved scope of services for this project. According to the June 2022 Chain Search performed by The Fox Group, the entire parcel 018-152-12, including the subject property, is currently owned by the State of California.

4.2 Environmental Liens or Activity and Use Limitations

Mr. Teddy Newmyer, Associate Director of Real Estate Development, Eden House and User, indicated, via a completed User Questionnaire, that he was not aware of AULs, such as engineering controls, land use restrictions, and institutional controls that have been filed or recorded on the subject property. Cameron-Cole also queried the California Environmental Protection Agency's (CalEPA's) online database in which the subject property was not identified.

4.3 Specialized Knowledge

Mr. Newmyer indicated he does not possess specialized knowledge or experience that is material to RECs in connection with the subject property or nearby properties.

4.4 Commonly Known or Reasonably Ascertainable Information

Mr. Newmyer was asked to provide any commonly known or reasonably ascertainable information within the local community about the subject property that is material to RECs in connection with the subject property. Mr. Newmyer stated that the subject property was previously used as by San Quentin State Penitentiary as a gun range.

4.5 Valuation Reduction for Environmental Issues

Mr. Newmyer indicated he has no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

4.6 Owner, Property Manager, and Occupant Information

Current records reviewed indicate the parcel, 018-152-12, is owned by the State of California. The subject property was used by San Quentin State Penitentiary as a gun range, which is no longer in use.

4.7 Reason for Performing Phase I ESA

Mr. Newmyer indicated the reason for performing the Phase I ESA is to satisfy one of the requirements needed to preserve the landowner liability protections provided under CERCLA and/or to understand potential environmental conditions that could materially impact the development of the property.

A copy of the questionnaire completed by the User representative is provided in Appendix B.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources and Review

Envirosite provided Cameron-Cole with a comprehensive government agency information search in accordance with ASTM International Standard E1527-21. The regulatory search information and a legend of the database acronyms are presented as Appendix C, Government Records Report. Maps depicting properties listed in the various databases searched by Envirosite are also provided. The table below provides a summary of the federal records reviewed along with each record's AMSD from the subject property (SP).

SUBJECT PROPERTY

The subject property was not identified in any databases in the regulatory search provided by Envirosite.

HIST AST-CA

The AST databases include sites where an AST has historically been in use or is actively in use at a facility. According to the Envirosite Report, there are two HIST AST - CA sites located within the AMSD of the subject property. One site is located within an inferred cross-gradient location from the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. No further information is provided regarding the AST.

HIST UST - CA

The UST databases include sites where a tank and any underground piping connected to the tank has at least 10 percent of its combined volume underground. According to the Envirosite Report, there are two HIST UST - CA sites located within the AMSD of the subject property. One site is located within an inferred cross-gradient location from the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. In 1979, a 1000- and 500-gallon tanks were installed on the property for use of waste and gasoline. No violations are reported in association with the USTs and no further information is provided.

ENVIROSTOR – CA

ENVIROSTOR – CA is a database of historical listing of tank facilities that are subject to the California Aboveground Petroleum Storage Act. According to the report provided by Envirosite, there are twelve sites listed in the Envirostar – CA database located within the ASMD. One site is located with inferred cross-gradient locations from the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. The site was previously under remediation for contaminated fill soils and contaminated groundwater from a gasoline AST. As of 2006, the Department of Toxic Substances Control (DTSC) has determined that no further action is necessary with respect to investigation and remediation of hazardous substances at the property.

ERNS

ERNS is a federal database of Emergency Response Notification System of records of reported spills. According to the report provided by Envirosite, there is one site listed in ERNS database within the ASMD. San Quentin Prison Main Pump Station is located 0.006 miles east southeast (inferred cross-gradient) from the parcel and approximately 0.25 miles from the subject property. In 2014 a gasoline tanker truck spilled approximately 1800 gallons of gasoline on Sir Francis Drake Boulevard and San Quentin State Prison. No corrective action information is provided by the database.

HWG – CA

The Hazardous Waste Generator database provides a listing of hazardous waste generators According to the report provided by Envirosite, there are eleven sites listed in the Envirostar – CA database located within the ASMD. One site is located with inferred cross-gradient locations from the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. The facility is listed with an inactive status and no reported violations according to the Envirosite Report.

RCRA-SQG

Small Quantity Generators (SQG) generate more than 100 kilograms, but less than 1,000 kilograms of hazardous waste per month. According to the Envirosite Report, there is one RCRA_SQG site located within the AMSD of the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. No reported violations according to the Envirosite Report.

RCRA-LQG

Large Quantity Generators (LQG) generate more than 1,000 kg of hazardous waste during any calendar month; or generate more than 1 kg of acutely hazardous waste during any calendar month; or generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1 kg of acutely hazardous waste at any time; or generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time. According to the Envirosite Report, there is one RCRA_LQG site located within the AMSD of the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. No reported violations according to the Envirosite Report.

5.2 Additional Environmental Record Sources and Review

The table below provides a summary of the additional environmental records reviewed along with each record's AMSD from the subject property.

CALEPA SITES – CA

The CalEPA Sites – CA database provides a listing of CalEPA regulated sites from the Certified Unified Program Agencies (CUPA) database. According to the Envirosite Report, there are eleven CalEPA Sites -CA sites located within the AMSD and five are located with inferred cross-gradient locations from the subject property. San Quentin Prison Main Pump Station is located 0.006 miles east southeast (inferred cross-gradient) from the parcel and approximately 0.25 miles from the subject property. According to the database, one violation has was issued pertaining to training documents not available at the time of inspection. Drake Cove is located 0.064 miles west from the subject property from the subject property. No violations were reported in association with the site. SQ Boiler Replacement is located 0.186 miles east southeast from the subject property. No violations are associated with this site. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. The database indicated that this site stores diesel and propane, but no violations have been reported in association with the site. Former Larkspur Wastewater Treatment Plant is located 0.197 miles west from the subject property. No violations were reported in association with the site.

HIGH FIRE – CA/FIRE AREAS – CA

HIGH FIRE – CA is a database of fire hazard severity zones mapped as areas of significant fire hazards on the basis of fuels terrain weather and other factors. FIRE AREA – CA is a multi-agency statewide database of fire perimeters. According to the report provided by Envirosite, four sites are located on and immediately to the northwest section of the parcel and upgradient subject property. These databases state that a wildfire has occurred in these areas but no information regarding the fire is provided.

HAZNET - CA

HAZNET – CA is a database of hazardous waste manifests from when hazardous waste is transported from generators to permitted recycling treatment storage or disposal facilities by registered hazardous waste transporters. According to the report provided by Envirosite, eleven sites are located within the AMSD. Four are located with inferred cross-gradient locations from the subject property. Drake Way is located 0.246 miles west northwest from the subject property from the subject property. No violations were reported in association with the site and is currently listed as inactive. San Quentin Medical Warehouse is located 0.186 miles east southeast from the subject property. No violations were reported in association with the site and is currently listed as inactive. Douglas Telecommunications Inc is located 0.191 miles west of the subject property. No violations were reported in association with the site and is currently listed as inactive. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. No violations were reported in association with the site and is currently listed as inactive.

MANIFEST EPA

The Manifest EPA database of EPA hazardous electronic manifest system. According to the report provided by Envirosite, there are four sites listed in the MANIFEST EPA database located within the ASMD. One is located with inferred cross-gradient locations from the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. No violations were reported in association with the site.

NFA – CA

NFA – CA database provides a listing of No Further Action sites. According to the Envirosite Report, there is one RCRA_SQG site located within the AMSD of the subject property. Ross Valley Sanitary District Wastewater Treatment Plant is located 0.191 miles west from the subject property. This site was part of a DTSC a Site Cleanup Program and as of 2006, the site was listed as No Further Action.

5.3 Unmappable Summary

The Government Records Report contains an Unmappable Summary for those sites that may be located in the general area of the subject property; yet do not have adequate location addresses or latitude/longitude coordinates to pinpoint their location in relation to the subject property. Three sites were identified in the Unmappable Summary. Two of the sites have a case closed status. The third site does not list status or violations.

5.4 Additional Environmental Record Sources

5.4.1 County Property Assessor/Appraiser

According to the Marin County Assessors online records, the subject property is section of the parcel 018-152-12. Based on the information of the June 2022 Chain Search performed by The Fox Group, the entire parcel, including the subject property, is currently owned by the State of California.

5.4.2 Fire/Police Officials

Cameron-Cole contacted the Central Marin Fire Department via email June 24, 2022 requesting records regarding fires, responses to incidents, spills, or releases of hazardous substances or petroleum products at, or in the immediate vicinity

of, the subject property. Ms. Meaghan Pang responded on June 27, 2022 that the subject property does not belong to their jurisdiction and to contact Marin County Certified Unified Programs Agency (CUPA).

5.4.3 Other Record Sources

Cameron-Cole contacted the Sacramento County Environmental Management Department via email on June 24, 2022 requesting records pertaining to the registration, use, storage, or handling of hazardous substances or petroleum products, including storage tanks associated with the subject property. A response was received on July 5, 2022 with a document pertaining to 1995 installation of the hydrogen peroxide odor control facility as part of the CMSA easement agreement. Cameron-Cole queried the California Geologic Energy Management Division (CalGEM, formerly Division of Oil, Gas, & Geothermal Resources or DOGGR) online mapping database for records regarding oil or gas wells on the subject property. A search of the database did not indicate any oil or gas wells were on the subject property

5.5 Physical Setting Sources

5.5.1 Topography

Figure 1 is a Site Location Map. The map was reviewed to establish the physical setting of the subject site and surrounding area. The subject property lies at approximately 35 ft above mean sea level and with a topography that slopes inwards to the south, east, and west. The base of these slopes meets in the relatively flat area that was the former gun range. The San Francisco Bay is approximately 430 ft from the entrance of the subject property.

5.5.2 Soils/Geology

The Envirosite Report provides a summary of the United States Department of Agriculture (USDA) Soil Survey of the subject property's general area. According to the Envirosite Report, the soil components on-site are identified as Blucher Series, Urban land, and Tocaloma Series. The soil ranges from silt loam, loam, miscellaneous and somewhat poorly drained.

5.5.3 Hydrology

Based on topographic maps, and considering regional flow patterns, the groundwater flow in the vicinity of the site is inferred to be in a southerly direction toward the San Francisco Bay. According Second Semiannual 2021 Groundwater and Soil Gas Monitoring Report conducted for San Quentin State Penitentiary, located to the southeast of the subject property, groundwater elevation ranged from 11 ft to 17 ft with a flow direction to the south-southwest. It must be noted that groundwater flow direction can be influenced by factors such as surface topography, underground structures, tidal influences, seasonal fluctuation, soil, and production wells which were not considered in this interpretation. Therefore, actual groundwater flow direction under the subject property can only be determined conclusively through the use of groundwater wells and collection of depth-to-water and surface elevation measurements.

5.6 Historical Use Information on Adjoining Properties

Available historical resources were consulted to develop a history of the previous uses of the property, in order to help identify the likelihood of past uses having led to RECs in connection with the property. Copies of the aerial photographs,

historical topographic maps, Sanborn Maps, City Directory Report, and chain-of-title and property ownership information are provided in Appendix D.

5.6.1 Aerial Photographs

The aerial photographs described below were obtained from Envirosite. Copies of the 1931, 1947, 1948, 1952, 1957, 1958, 1960, 1965, 1966, 1968, 1969, 1971, 1972, 1975, 1982, 1983, 1985, 1987, 1989, 1991, 1993, 1998, 2005, 2009, 2010, 2012, 2014, 2016, 2018, and 2020 aerial photographs are provided in Appendix D.

Date: 1931 through 1957
Scale: 1" = 500'
Description of Subject Property: No structures are present. Dirt access roads are visible.
Adjoining North: What appears to be undeveloped land with roads.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: What appears to be undeveloped land
Surrounding Area: Primarily undeveloped land with roads.

Date: 1960
Scale: 1" = 1000'
Description of Subject Property: No structures are present. Dirt access roads are visible.
Adjoining North: What appears to be undeveloped land with roads.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: What appears to be undeveloped land
Surrounding Area: Interstate 580 is visible to the north.

Date: 1965
Scale: 1" = 500'
Description of Subject Property: A rectangular structure or pad and dirt roads are visible.
Adjoining North: What appears to be undeveloped land with roads.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: What appears to be undeveloped land with visible dirt roads and two small rectangular structures along Sir Francis Drake Boulevard
Surrounding Area: Interstate 580 is visible to the north.

Date: 1966-1968
Scale: 1" = 1000'
Description of Subject Property: A rectangular structure or pad and dirt roads are visible.
Adjoining North: What appears to be undeveloped land with roads.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: What appears to be undeveloped land with visible dirt roads and two small rectangular structures along Sir Francis Drake Boulevard
Surrounding Area: Interstate 580 is visible to the north. Development is visible along the northern shoreline.

Date: 1969 through 1975

Scale: 1” = 500’

Description of Subject Property: A rectangular structure or pad and dirt roads are visible.
Adjoining North: What appears to be undeveloped land with roads.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Two small rectangular structures along Sir Francis Drake Boulevard, six round structures are visible along with appears to be land clearing or development
Surrounding Area: Interstate 580 is visible to the north. Development is visible along the northern shoreline.

Date: 1982
Scale: 1” = 1000’

Description of Subject Property: A rectangular structure or pad and dirt roads are visible.
Adjoining North: What appears to be undeveloped land with roads followed by cleared land.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Two small rectangular structures along Sir Francis Drake Boulevard, six round structures are visible along with appears to be land clearing or development
Surrounding Area: Interstate 580 is visible to the north. Development and structures are visible along the northern shoreline. Structures are visible to the west and northwest.

Date: 1983 - 2005
Scale: 1” = 1000’

Description of Subject Property: A rectangular structure or pad and dirt roads are visible. A paved lot is visible.
Adjoining North: What appears to be undeveloped land with roads followed by what appears to be structures from the Central Marin Sanitation Agency.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Two small rectangular structures along Sir Francis Drake Boulevard, six round structures are visible along with appears to be land clearing or development
Surrounding Area: Interstate 580 is visible to the north. Development and structures are visible along the northern shoreline. Structures are visible to the west and northwest.

Date: 2009 - 2020
Scale: 1” = 500’

Description of Subject Property: The rectangular structure is no longer visible. Dirt roads and a paved lot is visible.
Adjoining North: What appears to be undeveloped land with roads and a rectangular structure followed by what appears to be structures from the Central Marin Sanitation Agency.
Adjoining East: Structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Two small rectangular structures along Sir Francis Drake Boulevard, a paved road and residential structures are visible.
Surrounding Area: Interstate 580 is visible to the north. Development and structures are visible along the northern shoreline. Structures are visible to the west and northwest.

5.6.2 Fire Insurance Maps

The Sanborn Map Report provided by Envirosite shows that coverage does not exist for the site and site vicinity.

5.7.3 Recorded Land Title Records

Recorded land title records were not provided by Envirosite.

5.7.4 Historic USGS Topographic Maps

The historic topographic maps described below were obtained from Envirosite. Copies of the 1895, 1899, and 1915 (San Francisco 15-Minute), 1897, 1941, and 1950 (Tamalpais 15-Minute), 1947, 1948, 1959, 1959/1968, 1959/1980, 1993, 1995, 2012, 2015, 2018, and 2021(San Quentin 7.5-Minute), 1954/1980, 1954, 1954/1968, 1993, 1995, 2012, 2015, 2018, and 2021 (San Rafael 7.5 Minute) topographic maps are provided in Appendix D.

Date: 1895 through 1915
Scale: 1: 62500, 1:24000

Description of Subject Property: Undeveloped land. Roads are present along southern boundary and through the parcel property.
Adjoining North: Undeveloped land.
Adjoining East: Undeveloped land.
Adjoining South: Undeveloped land.
Adjoining West: Undeveloped land.
Surrounding Area: Structures present to the west and east along the shoreline.

Date: 1941 through 1950
Scale: 1: 62500, 1:24000

Description of Subject Property: Undeveloped land. Roads are present along southern boundary and through the parcel property.
Adjoining North: Undeveloped land.
Adjoining East: Undeveloped land followed by Sir Francis Drake Boulevard and structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Undeveloped land.
Surrounding Area: Structures present to the west and east along the shoreline. Structures and roads present in the areas west of the parcel. Piers are present on the eastern point.

Date: 1954 through 1959
Scale: 1: 62500, 1:24000

Description of Subject Property: Undeveloped land. Roads are present along southern boundary and through the parcel property.
Adjoining North: Undeveloped land.
Adjoining East: Undeveloped land followed by Sir Francis Drake Boulevard and structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Circular structures are visible with a area labeled “Sewage Disposal”.
Surrounding Area: Structures present to the west and east along the shoreline. Structures, roads, and an area labeled “gravel pit” are present in the areas west of the parcel. The San Rafael-Richmond Bridge is visible to the east that continues to Interstate 580 that follows along the northern shoreline.

Date: 1993 through 1995
Scale: 1:24000

Description of Subject Property: Two structures are noted. Roads are present along southern boundary and

through the parcel property.
Adjoining North: Undeveloped land followed by structures from the Central Marin Sanitation Agency,
Adjoining East: Undeveloped land followed by Sir Francis Drake Boulevard and structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Circular structures are visible with an area labeled “Sewage Disposal”.
Surrounding Area: Roads and structures are present to the west. Gravel pits and sewage disposal is no longer visible on the map. San Rafael-Richmond Bridge to the east and interstate 580 to the north

Date: 2012 through 2021
Scale: 1:24000

Description of Subject Property: No structures are noted on the maps. Roads are present along southern boundary and through the parcel property.
Adjoining North: Undeveloped land followed by structures from the Central Marin Sanitation Agency
Adjoining East: Undeveloped land followed by Sir Francis Drake Boulevard and structures of the San Quentin State Penitentiary
Adjoining South: Sir Francis Drake Boulevard followed by the San Francisco Bay
Adjoining West: Circular structures are visible with a area labeled “Sewage Disposal”.
Surrounding Area: Roads and structures are present to the west. San Rafael-Richmond Bridge to the west and interstate 580 to the north.

5.7.5 Local Street Directories

Historical street directories for the subject property and surrounding property addresses were provided by Envirosite. The subject property appears in the City Directory in 1998, 2002, 2006, 2010, 2015, and 2018 records provided by Envirosite. A summary of the findings is provided in Appendix D.

5.6.6 Building Department Records

Historical use of the subject property was researched using other standard historical sources. Therefore, Building Department records were not reviewed as part of this assessment.

5.6.7 Zoning/Land Use Records

Historical use of the subject property was researched using other standard historical sources. Therefore, historical Zoning/Land Use records were not reviewed as part of this assessment.

5.6.8 Prior Phase I Assessment Reports

Cameron-Cole was provided with a previous Phase I ESA Report conducted by AECOM in 2020.

5.7 Historical Use Information on Adjoining Properties

The following is a summary of adjoining property historical uses based on a review of the historical records reviewed in Section 5.7.

North: Adjoining property to the north is the undeveloped remaining 018-152-12 parcel followed by the development of the Central Marin Sanitation Agency in the 1990s.

East: Adjoining property to the east is depicted undeveloped remaining 018-152-12 parcel followed by Sir Francis Drake Boulevard and San Quentin State Penitentiary.

South: Adjoining property to the south is depicted as Sir Francis Drake Boulevard followed by undeveloped shoreline and the San Francisco Bay.

West: Undeveloped land until the 1950 and the area appears to be used as a gravel pit and sewage disposal area. These structures were gone by the 1980s and 1990s and residential structures and roadway are present until current day.

5.8 Data Failure

The objective of the historical research is to develop a history of the previous uses of the property and surrounding area to help identify the likelihood of past uses having led to RECs in connection with the subject property. Data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives of the Phase I ESA have not been met. If the data failure represents a significant data gap to the Environmental Professional (EP), ASTM International Standard E1527-21 requires documentation on the impact of the data gap on the ability of the EP to identify RECs.. Information developed through the completion of this Phase I ESA is adequate to satisfy the historical research requirements. It is the opinion of the EP that no data failure has occurred which resulted in an inability to develop an accurate assessment of the historic usage of the subject property.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

The methodology used by the Cameron-Cole representative during the June 23, 2022, site reconnaissance consisted of visual observations of readily accessible areas of the subject property to determine the presence or absence of hazardous substance or petroleum product storage areas or spills as indicated by stressed vegetation, soil staining, storage tanks, drums, etc.

6.2 General Site Setting

The subject property consists of a section of a parcel of land comprising approximately 16 acres. The property is identified by the Marin County Assessor's Office as Assessor Parcel Numbers (APNs) 018-152-12. Land uses in the vicinity of the property can generally be described as residential and undeveloped. The San Quentin State Penitentiary is located to the east of the subject property. A Site Vicinity Map depicting the subject and adjoining properties is provided as Figure 2. Photographic documentation of the site and neighboring property conditions is presented in Appendix A, Photographs.

6.2.1 Geologic, Hydrogeologic, and Topographic Conditions

The subject property is situated at the base of a hillside that slopes in a southerly direction. Based on topographic maps, and considering regional flow patterns, the groundwater flow in the vicinity of the site is inferred to be in a southerly direction toward the San Francisco Bay. It must be noted that groundwater flow direction can be influenced by factors such as surface topography, underground structures, tidal influences, seasonal fluctuation, soil, and production wells which were not considered in this interpretation.

6.2.2 General Description of Structures

The subject property is primarily undeveloped. The property was formerly used as a gun range but is no longer in use. A remnant wall is visible along the eastern boundary, but the property is covered in dense vegetation. The only structures on site are a sewer junction box and a hydrogen peroxide injection station that belongs to CMSA as a part of an easement agreement. The sewer junction box is 20 ft by 15 ft by 3 ft concrete structure with two open ended hooked pipes coming out the top of the structure. There is no access to the structure, and it was reported by (insert site contact name) to be used as sewer junction. The second structure is also owned by CMSA and enclosed area on a 20 ft by 25 ft concrete pad. The is enclosed by a fence on the side and on top. Inside is a 4000-gallon AST used to inject hydrogen peroxide in the sewer system for odor control. The CMSA structures are accessible by the paved lot and are adjacent to the property entrance.

6.2.3 Roads

The subject property can be accessed via Sir Francis Drake Boulevard from the southern property boundary.

6.2.4 Potable Water Supply

Cameron-Cole observed no potable water supply during the site reconnaissance. Mr. Newmyer stated in the Pre-Site Questionnaire that the water provider is the Marin Municipal Water District.

6.2.5 Sewage Disposal System

Cameron-Cole observed no sewer disposal system during site reconnaissance. Mr. Newmyer stated in the Pre-Site Questionnaire that the sewer provider is the Ross Valley Sanitary District.

6.3 Interior and Exterior Observations

The subject property is comprised of a portion of a single parcel of land approximately 16 acres. The subject property was formerly a gun range used by San Quentin State Penitentiary. Structures used as the gun range are no longer present on the subject property. However, a remnant concrete wall, associated with the gun range, is located along the eastern boundary of the property.

Near the southwest corner of the subject property is the fenced concrete pad containing the hydrogen peroxide odor control facility and junction pad used by CMSA as part of the easement agreement. The fenced in area contains a 4,000-gallon hydrogen peroxide storage tank. The fenced in area was locked at the time of the site reconnaissance and Cameron-Cole was limited to observing the area through gaps in the fence.

6.3.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

In the 1970s, the subject property was formerly a gun range used by San Quentin State Penitentiary. The gun range is no longer in use and the subject property is currently covered in thick brush, grasses, shrubs, and trees. The gun range layout was such that ammunition was fired toward the hillside. Lead ammunition is primarily used in firearms and no known remediation efforts have taken place at the property. It is likely that lead from the ammunition is present in the soil.

In 1995, a hydrogen peroxide injection system was added to the CMSA sewer system as a means of odor control. No records violations have been noted pertaining to the injection system.

6.3.2 Storage Tanks

One AST used for hydrogen peroxide was observed on the subject property at the time of the site reconnaissance. The AST is stored on a concrete pad. In addition, no surficial evidence of vent lines, fuel dispenser islands, or other structures indicative of USTs were observed on the subject property at the time of the site reconnaissance.

6.3.3 Odors

Noticeable odors were not identified at the subject property at the time of the site reconnaissance.

6.3.4 Pools of Liquid

No pools of liquid were observed at the time of the site reconnaissance.

6.3.5 Drums

Drums were not observed on-site at the time of the site reconnaissance.

6.3.6 Hazardous Substance and Petroleum Product Containers Not in Connection with Identified Uses

Hazardous substances or petroleum product containers not in connection with identified uses were not observed on the subject property during the site reconnaissance.

6.3.7 Unidentified Substance Containers

No unidentified containers were observed on the subject property.

6.3.8 Indicators of PCBs

Polychlorinated biphenyls (PCBs) are contained in coolant or lubricating oils used in some electrical transformers, electrical panels, or other similar equipment. A pole-mounted transformer was observed in on the southern boundary of the subject property. No visible evidence of leaks or discharges was observed on, or in the vicinity of, the transformer at the time of the site reconnaissance.

6.4 Interior Observations

No enclosed structures are present on the subject property.

6.5 Exterior Observations

6.5.1 Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed on the subject property during the site reconnaissance.

6.5.2 Stained Soil or Pavement

De minimis areas of staining, typical of those commonly observed in paved lots, was observed. Stained soil or pavement was not observed at the time of the site reconnaissance.

6.5.3 Stressed Vegetation

Areas of dead/stressed vegetation were not observed on the subject property at the time of the site reconnaissance.

6.5.4 Solid Waste

Solid waste was observed in multiple areas across the subject property during site reconnaissance. A homeless camp was observed up the hill from the subject property and trash/waste, was observed in various area around the property.

6.5.5 Wastewater

Cameron-Cole did not observe any wastewater systems on-site during the site reconnaissance that were not associated with the CMSA easement.

6.5.6 Wells

Cameron-Cole did not observe any wells on the subject property at the time of site reconnaissance.

6.5.7 Septic Systems

Cameron-Cole did not observe any sceptic systems on-site during the site reconnaissance.

7.0 INTERVIEWS

7.1 Site Owner/Occupants

Site owner or occupants were not interviewed for this ESA.

Joshua Palmer, Real Estate Developer, Thompson Dorfman Partners, LLC, was the Key Site Manager representative during site reconnaissance on June 23, 2022.

7.2 Past Owners, Operators, Occupants

Past owners, operators, or occupants were not interviewed for this ESA.

7.3 User

Mr. Teddy Newmyer, Associate Director of Real Estate Development, Eden House and User completed the User Questionnaire on behalf of FCS. A summary of the responses is provided in Section 4.0, and a copy of the questionnaire is provided in Appendix B.

7.4 State and/or Local Government Officials

Cameron-Cole contacted the County of Marin via email on June 24, 2022 requesting records pertaining to the registration, use, storage, or handling of hazardous substances or petroleum products, including storage tanks associated with the subject property. A response we received on July 5, 2022 which included a copy of the 1995 CMSA easement agreement for the installation of the hydrogen peroxide injection system.

Cameron-Cole contacted the Central Marin Fire Department via email on June 24, 2022, requesting records pertaining to the registration, use, storage, or handling of hazardous substances or petroleum products, including storage tanks associated with the subject property. A response was received stating that Cameron Cole should contact Marin County for further information.

Interview documentation is also provided in Appendix E.

8.0 FINDINGS

The goal of this Phase I ESA is to identify the presence or likely presence of hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water on the property. The findings of this report are summarized below and may include known or suspect RECs, CRECs, HRECs, or *de minimis* conditions identified during the performance of this Phase I ESA.

- The historic use of the subject property as a gun range operated by San Quentin State Penitentiary. No known remediation has occurred at the property.

- A hydrogen peroxide injection system was added the CMSA sewer easement to aid in odor control of the sewer system. A sewer junction structure is present on the subject property.

- According to the Envirosite Report, there are eleven RCRA-LQG sites located within the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are three RCRA-NONGEN sites located within the AMSD of the subject property, but not including the subject property.

- According to the Envirosite Report, there is one RCRA-SQG/VSQG sites located within the AMSD of the subject property, but not including the subject property.

- According to the Envirosite Report, there are twelve ENVIROSTOR - CA sites located within the AMSD of the subject property, but not including the subject property.

- According to the Envirosite Report, there are two SWRCY sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one ALT FURLING sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are four DEBRIS EPA SWRCY sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one MANIFEST EPA site located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one RMP site located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are four DEBRIS EPA SWRCY sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are eleven CALEPA SITES - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are four FA 2 -CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are eleven HAZNET - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there is one HIGH FIRE - CA site located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are two HWP - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are two HWT - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are two LDS - CA sites located with the AMSD of the subject property, not including the subject property.

- According to the Envirosite Report, there are one NFA - CA site located with the AMSD of the subject property, not including the subject property.

9.0 OPINION

With reference to the foregoing section of this report (Section 8.0), the following Opinions are provided in connection with this assessment.

- The subject property was historically used as a gun range for San Quentin State Penitentiary. Due to the use of lead ammunition and lack of known remediation efforts, it is assumed that lead is still present in the soil. Based on this information, in the opinion of Cameron-Cole, the likelihood of lead contamination in the soil does constitute a REC as defined by the applicable standard.

- A hydrogen peroxide injection system was added the CMSA sewer easement to aid in odor control of the sewer system. A sewer junction structure is present on the subject property. No known violations are associated with the sewer easement and the hydrogen peroxide injection system. The AST and concrete pad appear to be maintained with no obvious cracks or staining. This system provides no evidence of a REC as defined by the applicable standard.

- According to the Envirosite Report, there are two HIST AST - CA sites located within the AMSD of the subject property, including not the subject property. No violations were identified for either facility in connection with this database listing. Based on this information, in the opinion of Cameron-Cole, the identified HIST AST - CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are two HIST UST - CA sites located within the AMSD of the subject property, but not including the subject property. No violations were identified for this facility in connection with this database listing. Based on this information, in the opinion of Cameron-Cole, the identified HIST UST - CA sites donot constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are twelve Envirostar – CA sites located within the AMSD of the subject property, but not including the subject property. No violations were identified for either facility in connection with this database listing. Based on this information, in the opinion of Cameron-Cole, the identified Envirostar – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are eleven HWG – CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified HWG – CA sites does not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there is one RCRA_SQG site located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified RCRA_SQG site does not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there is one RCRA_LQG site located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified RCRA_LQG site does not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are eleven CALEPA SITES – CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified CALEPA SITES – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are four HIGH FIRE – CA/FIRE AREAS – CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified HIGH FIRE – CA/FIRE AREAS – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are four HAZNET - CA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified HAZNET - CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there are four MANIFEST EPA sites located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified MANIFEST EPA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosite Report, there is one NFA – CA site located within the AMSD of the subject property, but not including the subject property. All cases were listed as complete at the time of this report. Based on this information, in the opinion of Cameron-Cole, the identified NFA – CA site does not constitute a REC in connection with the subject property as defined by the applicable standard.

10.0 CONCLUSIONS

In summary, Cameron-Cole has performed the Phase I Environmental Site Assessment, in general conformance with the scope and limitations of ASTM International Standard E1527-21, for the property located at 018-152-12 in the unincorporated area of San Quentin, Marin County, California, the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has revealed evidence of RECs in connection with the subject property. The historic use of the property as a gun range, use of lead ammunition, and no known remediation efforts of the site indicates a likely release to the environment.

11.0 DEVIATIONS

There were no contractual excluded elements or deviations from the ASTM International Standard E1527-21.

User – Mr. Teddy Newmyer, Associate Director of Real Estate Development, Eden House, interview conducted via User Questionnaire completed on June 22, 2022. (Email: Teddy.Newmyer@edenhousing.org).

Key Site Manager Representative – Joshua Palmer, Real Estate Developer, Thompson Dorfman Partners, LLC interview conducted during site reconnaissance on June 23, 2022. (Email: JP@ThompsonDorfman.com)

Local Official – Meaghan Pang, Central Marin Fire, interview conducted via email on June 24, 2022. (Email: mpang@centralmarinfire.org).

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The undersigned Cameron-Cole professional was involved with the records search, regulatory review, and drafting of the Phase I Environmental Site Assessment for the property located at 018-152-12, San Quentin, Marin County, California. Qualifications of the undersigned and additional support personnel involved with the site reconnaissance and interviews are provided in Appendix F.

Prepared by:

Amy Robson

This is to certify that I have reviewed and approve the contents of the Phase I Environmental Site Assessment for the property located at 018-152-12, San Quentin, Marin County, California. Qualifications of the environmental professional are provided in Appendix F.

Reviewed by:

Mike Stephenson, Principal Scientist

14.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

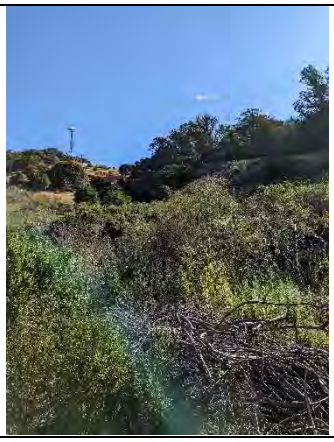
APN: 018-152-12
Sir Francis Drake Boulevard
San Quentin, California

Photograph 1. View of paved parking area off of Sir Francis Drake Blvd, Facing South-West. The odor control facility and sewer junction box in the background.



Photograph 2. View of northern boundary of the subject property facing north. Cell tower at the top of the hill is outside the property.

Photograph 3. Western boundary of property showing adjacent residential properties and the associated property border and fence. Facing west northwest. Former gun range location in the foreground.

Photograph 4. Eastern boundary and remnants of the gun range, facing east.

Photograph 5. View of the hillside bordering eastern edge of the project site. Photo taken facing north-east.

Photograph 6. View of dense vegetation and northern boundary of site, facing north.

Photograph 7. View of dense vegetation and northern boundary of the property, facing north.

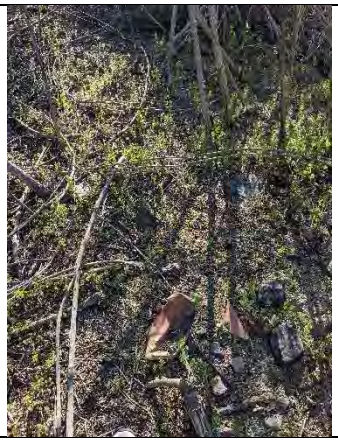
Photograph 8. View of paved parking are off of Sir Francis Drake Boulevard and fenced in hydrogen peroxide odor control system, facing south-west.

Photograph 9. View of one of two beehives located on the site near the eastern boundary.

Photograph 10. View of one of two beehives located on the site near the eastern boundary.

Photograph 11. View of utility pole with out of service loud speaker located in paved area on southern end of site. Photo taken facing east.

Photograph 12. View of pole-mounted transformer. Outside the fence along the southern boundary on Sir Francis Drake Boulevard. Facing southeast.

Photograph 13. View of debris pile adjacent to the paved lot along the southern boundary	Photograph 14. View of a debris pile present on the site along the eastern boundary.
	


Photograph 15. View of broken pottery and miscellaneous debris toward the northeastern boundary.	Photograph 16. Small concrete lined depression in the soil.
Photograph 17. Two valve boxes near the paved lot. Appear to no longer be in use.	Photograph 18. Steel plate covered vault. Contents are unknown. Near the paved lot.

Photograph 19. View of electrical control box mounted on concrete filled metal pole. Located near paved lot.	Photograph 20. Front side of enclosed and locked hydrogen peroxide system, with concrete containment pad, facing south.
Photograph 21. View of drain within the concrete pad in front of fenced area.	Photograph 22. View of pipelines coming out of enclosed hydrogen peroxide system area.
Photograph 23. View of southern side of enclosed hydrogen peroxide containment area. Facing west.	Photograph 24. View of concrete box labeled as “electrical” near hydrogen peroxide system.

Photograph 25, View of access door on western side of enclosed hydrogen peroxide system area.	Photograph 26, View of locked metal cabinets on eastern side of enclosed hydrogen peroxide system.
Photograph 27. View of 4000 gallon AST used for the hydrogen peroxide system.	Photograph 28. The interior of the hydrogen peroxide system area. Facing north.
Photograph 29. Steel plate covered ground access hatch adjacent to CMSA junction box.	Photograph 30. View of the exterior to the junction box.

Photograph 31. View of drainage pipe along the southern boundary of the property	Photograph 32. View of the sewer junction box.
Photograph 33, View of stormwater drain on the paved lot near the southern boundary.	Photograph 34. View of drain located in paved lot at the gated entrance.
Photograph 35. View of trampled vegetation leading to the encampment uphill of the property.	Photograph 35. Cleared vegetation on the hillside leading up to the encampment.

Photograph 36. Red wires running throughout the side and uphill toward the encampment. The wires appear to not be connected to anything at the base of the hill.	Photograph 37. Close up of red wire.

APPENDIX B

User Questionnaire

CAMERON-COLE
AN ADEC INNOVATION

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-21 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Property Information.

Cameron-Cole/Client Project #: Property Name: Oak Hill Apartments

Property Address: Sir Frances Drake Blvd near Drake's Cove Road

City: Unincorporated Marin State: CA Zip:

Property Owner Name: State of California

Please answer the following questions as completely as possible. Attach additional pages as needed.

1. **Reason for Completion.** Is the reason for performing the Phase I to satisfy one of the requirements for the innocent landowner defense under CERCLA AND/OR to understand potential environmental conditions that could materially impact the operation of the business associated with the parcel of commercial real estate?

   _____x_____ Yes _____ No

   Other (indicate if required for property transaction, sale, purchase, exchange, lending requirement, etc). Phase I is needed for the planning of an apartment development on this site. _____

   _____

2. **Environmental Cleanup Liens**. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

   _____ Yes __x_____ No

   If yes, describe or attach details of the lien_____

   _____

3. **Activity and Land Use Limitations**. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

   _____ Yes ___x_____ No

   If yes, describe or attach details of the limitations_____

   _____

CAMERON-COLE
AN ADEC INNOVATION

PHASE I ESA USER'S QUESTIONNAIRE

4. **Specialized Knowledge or Experience**. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

   _____ Yes ____x_____ No

   If yes, describe or attach details of your specialized knowledge or experience_____
   _____

5. **Relationship of Purchase Price to Fair Market Value of Property**. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

   _____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

   ___x_____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

   _____ Not applicable. User is not involved in a purchase of the property.

6. **Commonly Known or Reasonably Ascertainable Information**. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

   Do you know the past uses of the property?
   ___x_____ Yes (describe) ___This property ___The property was previously used as a gun range for the prison. _____
   _____
   _____ No

   Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?
   _____ Yes (describe) _____
   _____
   __x_____ No

   Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?
   _____ Yes (describe) _____
   _____
   __x_____ No

   Do you know of any environmental cleanups that have taken place at the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

CAMERON-COLE
AN ADEC INNOVATION

PHASE I ESA USER'S QUESTIONNAIRE

7. **The Degree of Obviousness of Contamination**. E1527-21 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indictors that point to the presence or likely presence of contamination at the property?

   __x_____ Yes (describe) ___Potential lead contamination from the gun range
   _____
   _____
   _____ No

8. **Availability of Previous Environmental Reports**. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

   ___x_____ Yes (please identify and provide copies, if available) _____
   _____
   _____ No

9. **Proceedings Involving the Property**. Are you aware of any proceedings involving the property? For example:

   Are you aware of any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

   Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

   Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?
   _____ Yes (describe) _____
   _____
   __x_____ No

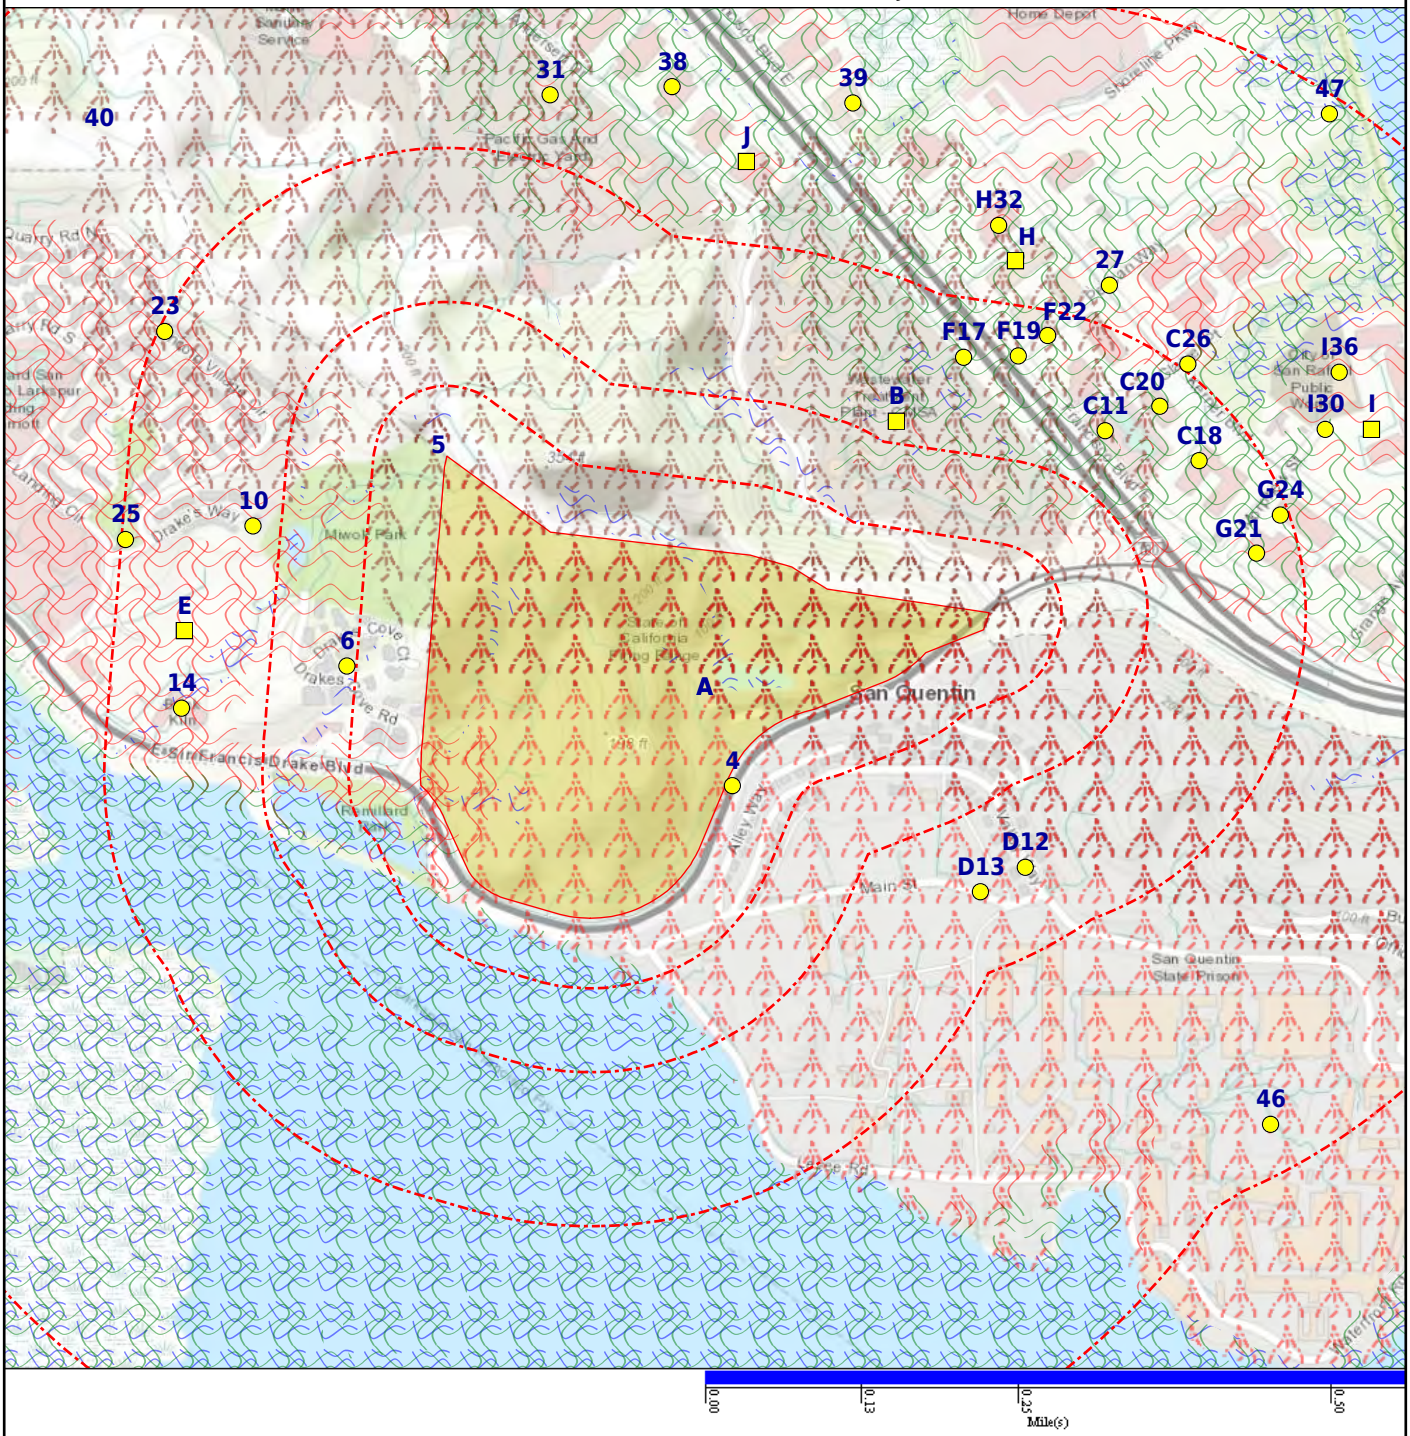
- Seismic (No Data)

SUBJECT NAME: San Quentin
ADDRESS: San Quentin, CA, 94964
LAT/LONG: 37.945009 / -122.499164

PREPARED FOR: Cameron-Cole- Alameda
ORDER #: 74023
REPORT DATE: June 22, 2022



- Subject Property
- CDC HAZDAT (No Data)
- Federal Lands (No Data)
- Fire Hazard Zone
- NWI
- Equal/Higher Elevation
- Department of Defense (No Data)
- FEMA FloodZone 100
- Historical DOD (No Data)
- Seismic (No Data)
- Lower Elevation
- DFIRM Floodzone 100
- FEMA FloodZone 500
- Indian Reservation (No Data)
- Area Of Concern (No Data)
- DFIRM Floodzone 500
- Fire Areas
- National Priority List (No Data)

Incident Information

Incident Date Time :	2014-07-14 07:50:00
Type of Incident :	MOBILE
Incident Cause :	TRANSPORT ACCIDENT
Incident DTG :	OCCURRED
Incident Location :	EAST OF WEST ENTRANCE TO SAN QUENTIN STATE PRISON
Sequence Number :	1089021
Potential Flag :	N
Description of Incident :	CALLER STATED THAT A TANKER TRUCK ROLLED OVER AND ALLOWED THE RELEASE OF APPROXIMATELY 1800 GALLONS OF GASOLINE ONTO THE GROUND AND ROADWAY. THE CALLER STATED THAT THE TANK TRAILER IS A DUAL TANK THAT CONTAINED GASOLINE AND DIESEL. THE DIESEL TANK IS IN TACT AND HAS A CAPACITY OF 1600 GALLONS. THE TANK WAS FULL (CONTAINED 1600 GALLONS OF DIESEL).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violation Date :	2020-11-09
Citation :	23 CCR 16 2715(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(f)
Description :	Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).
Notes :	Returned to compliance on 11/09/2020. UST AMC Inspection was due in October 2020. Discussed the requirements with facility representative, discussed the 12 month AMC testing requirement window, and that testing will still be due in October of 2021 by regulation. No further action needed at this time.

Citation : 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)

Description :

Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.

Notes :

Returned to compliance on 11/18/2016. At time of inspection, facility no longer had a monthly DO onsite to conduct monthly inspections of UST tanks. Robert Cole- DO for the facility had departed within the past couple weeks, therefore, facility is required to hire (internally and/or externally) a DO to conduct monthly inspections. Please provide new DO contact to Marin County CUPA within 30 days, and updated "Designated Operator Statement Agreement" form in CERS within 30 days.

Completed Activities

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Completed Date :	2006-10-20
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Preliminary Endangerment Assessment Report
Comments :	DTSC determines that no further action is necessary with respect to investigation and remediation of hazardous substances at the property.
Completed Date :	2006-07-05
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Other Report
Comments :	Results of subsurface investigation of soil and groundwater at the former Aboveground Storage Tank Locations. Soil samples collected from 7 boreholes and groundwater collected from two boreholes. This investigation was not overseen by DTSC but is included as background information.
Completed Date :	2006-05-02
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Other Report
Comments :	The results from the removal of comtaminated soil.

Completed Date : 2005-08-12
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : *Correspondence - Received

Comments : Response to DTSC's comments on the Negative Declaration and it's attached Phse 2 report.

Completed Date : 2005-02-10
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : *Correspondence - Received
Comments : Reports received

Completed Date : 2004-11-18
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : *Correspondence - Received

Comments : Letter requested clarification on specific samples and sampling methods utilized for the sampling event, that confirmation samples for arsenic should be conducted and leanup criteria for PCB should meet residential level.

Completed Date : 2004-06-30
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Other Report
Comments : Report was part of a submittal for a CEQA review.

Completed Date : 2004-06-23
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Other Report

Comments : DTSC determines that no further action is necessary with respect to investigation and remediation of hazardous substances at the property.

Completed Date : 2001-01-05
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Other Report
Comments : Groundwater is significantly free of mercury contamination.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Hazardous Waste Summary

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Waste Code / Name :
121 - Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)
122 - Alkaline solution without metals (pH > 12.5)
141 - Off-specification, aged, or surplus inorganics
212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
213 - Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)
221 - Waste oil and mixed oil
223 - Unspecified oil-containing waste
281 - Adhesives
341 - Organic liquids (nonsolvents) with halogens
551 - Laboratory waste chemicals

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

ALT FUELING

Facility Name :	PG&E - San Rafael Service Center
Facility Address :	1220 Andersen Dr, San Rafael, CA 94901
ID Number :	827
Date Last Confirmed :	2021-09-10
Status :	Open: The station is open.
Station Phone :	800-684-4648
Expected Date :	N/R
Groups With Access Code :	Public - Card key at all times
Access Days Time :	8am-4pm M-F; Customers must set up a PG&E account in advance of fueling; Station only accepts PG&E payment card; Contact PG&E LNG/CNG at 800-684-4648 x4 for payment card and station information
Cards Accepted :	Proprietor
Date Updated :	2022-02-10 19:42:29

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Report Cycle :	2017
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	HAZARDOUS WASTE DECOMPOSED FLARES
Primary NAICS :	811310 - Commercial and Industrial Machinery and Equipment (except Automotive and Electronic) Repair and Maintenance
Source Code :	G11 - Discarding off-specification, out-of-date, and/or unused chemicals or products
Form Code :	W319 - Other inorganic solids (specify in comments)
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.
Generation Tons :	0.025
Managed Tons :	0
Shipped Tons :	0.025
Received Tons :	0
Receiver ID :	UTD981552177
Receiver State :	UT
Shipper ID :	CAD981578156
Shipper State :	CA
Waste Minimization :	X - No waste minimization efforts were implemented for this waste
Waste Code List :	D001
Waste Code Group :	D001 - IGNITABLE WASTE
Waste Generation Type :	N/R

Source Description

Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Hazardous Waste Summary
Waste Code / Name : 132 - Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)
181 - Other inorganic solid waste
281 - Adhesives
331 - Off-specification, aged, or surplus organics
343 - Unspecified organic liquid mixture
352 - Other organic solids
741 - Liquids with halogenated organic compounds > 1000 mg/l
D001 - IGNITABLE WASTE
D002 - CORROSIVE WASTE
D006 - CADMIUM

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Status :	Open - Verification Monitoring
Begin Date :	1994-10-01
Global ID :	SL20238856
Region :	REGION 2

Site History :

The dry cleaner at San Quentin State Prison is housed in Building 39. Building 39 consist of three separate buildings: the dry cleaner building, the Labcon building, and the mattress factory building. Previous investigations in the vicinity of Building 39 indicate that soil and groundwater have been impacted by Stoddard Solvent and PCE and their breakdown products. Four monitoring wells, numerous temporary soil borings, and four permanent sub-slab soil vapor monitoring points have been installed beneath and in the vicinity of Building 39. In addition, three ambient air samples were collected inside Building 39 and one ambient air sample collected outside Building 39 as a background sample. In a letter dated 12/12/08, the Water Board concur that monitored natural attenuation as the remedial strategy for the site is the appropriate strategy. Historical and current groundwater analytical data indicates that biodegradation of the VOCs in groundwater has and is continuing to occur. The concentrations of PCE and TCE has decreased to low concentration or are below detection limits while cis-1,2-DCE, 1,1,1-TCA, and vinyl chloride concentrations is either increasing or has stabilized. There is also analytical evidence that the vinyl chloride is breaking down to methane and ethane. Analysis of the groundwater for natural attenuation parameters confirms that the subsurface environment in the vicinity of the Building 39 is conductive for the continuation of biodegradation of VOCs. Elevated chlorinated solvent concentrations in sub-slab soil vapor is addressed as a precaution to mitigate any concern about vapor intrusion into Building 39.

RB Case Number :	21S0020
Potential Media Affected :	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern :	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 181 - Other inorganic solid waste, 0.17500 tons to AZD081705402
2019: 551 - Laboratory waste chemicals, 0.01250 tons to CAD028409019
2019: 343 - Unspecified organic liquid mixture, 2.17500 tons to AZD081705402
2019: 331 - Off-specification, aged or surplus organics, 0.10000 tons to CAD982444481
2019: 551 - Laboratory waste chemicals, 1.46000 tons to CAD044429835
2019: 221 - Waste oil and mixed oil, 0.00000 tons to CAD982444481
2019: 551 - Laboratory waste chemicals, 0.15250 tons to AZD081705402
2019: 291 - Latex waste, 0.10000 tons to CAD982444481
2018: 181 - Other inorganic solid waste, 0.07500 tons to AZD081705402
2018: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.72600 tons to CAD008252405
2018: 551 - Laboratory waste chemicals, 0.45500 tons to CAD044429835
2018: 551 - Laboratory waste chemicals, 0.00750 tons to AZD081705402
2018: 343 - Unspecified organic liquid mixture, 1.40000 tons to AZD081705402
2018: 551 - Laboratory waste chemicals, 0.00500 tons to CAD028409019
2017: 343 - Unspecified organic liquid mixture, 1.4 tons to AZD081705402
2017: 132 - Aqueous solution with metals (< restricted levels and see 121), 0.02085 tons to CAD008252405
2017: 551 - Laboratory waste chemicals, 0.81 tons to CAD044429835
2017: 221 - Waste oil and mixed oil, 0.209 tons to CAD982444481
2017: 551 - Laboratory waste chemicals, 0.211 tons to CAD028409019
2017: 343 - Unspecified organic liquid mixture, 0.102 tons to CAD008252405

Violations

Violation Date : 2021-03-19

Citation : HSC 6.7 25291(a)(2) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(2)

Description : Failure to maintain secondary containment (e.g., failure of secondary containment testing).

Notes :

Returned to compliance on 05/11/2021. Garage diesel system UDC and diesel piping secondary containment failed SB989 testing. Generator diesel system piping sump failed SB989 testing. Correct root cause of failing SB989 testing, and schedule re-inspection for Marin CUPA to observe passing results. Contact Chris Rundell to schedule re-inspection and to request permitting if needed, 415-419-7730 / crundell@marincounty.org

Division : Marin County Dept of Public Works, Waste Mgmt, CUP
Program : UST
Source : CERS

Violation Date : 2020-09-01

Citation : HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Description :

"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Program : UST
Source : CERS

Violation Date : 2019-09-17

Citation : HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Description :

"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Notes :

Returned to compliance on 09/17/2019. Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. At inspection diesel bucket failed-replaced valve retested , passed.

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description

Source Description :

NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 331 - Off-specification, aged or surplus organics, 0.19100 tons to NVT330010000
2019: 181 - Other inorganic solid waste, 3.58150 tons to NVT330010000
2019: 291 - Latex waste, 1.70145 tons to AZR000520304
2019: 331 - Off-specification, aged or surplus organics, 0.00500 tons to CAD028409019
2019: 331 - Off-specification, aged or surplus organics, 0.28050 tons to AZR000520304
2019: 331 - Off-specification, aged or surplus organics, 0.01750 tons to CAD044429835
2019: 151 - Asbestos containing waste, 0.23000 tons to CAD982042475
2019: 223 - Unspecified oil-containing waste, 0.92105 tons to AZR000520304
2019: 352 - Other organic solids, 0.55450 tons to AZR000520304
2019: 181 - Other inorganic solid waste, 0.07050 tons to AZR000520304
2018: 181 - Other inorganic solid waste, 0.00950 tons to AZR000520304
2018: 151 - Asbestos containing waste, 0.08900 tons to AZR000520304
2018: 731 - Liquids with polychloronated biphenyls >= 50 Mg./L, 0.03750 tons to MXC130619001
2018: 331 - Off-specification, aged or surplus organics, 0.00500 tons to CAD028409019
2018: 331 - Off-specification, aged or surplus organics, 0.23750 tons to NVT330010000
2018: 331 - Off-specification, aged or surplus organics, 0.46500 tons to MXC130619001
2018: 122 - Alkaline solution without metals pH >= 12.5, 0.00500 tons to NVT330010000
2018: 331 - Off-specification, aged or surplus organics, 0.01000 tons to NVD980895338

Hazardous Waste Summary

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Waste Code / Name :

122 - Alkaline solution without metals (pH > 12.5)
141 - Off-specification, aged, or surplus inorganics
151 - Asbestos-containing waste
181 - Other inorganic solid waste
213 - Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)
223 - Unspecified oil-containing waste
281 - Adhesives
291 - Latex waste
331 - Off-specification, aged, or surplus organics
343 - Unspecified organic liquid mixture

Completed Activities

Completed Date :	1991-01-31
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Removal Action Completion Report

Comments : Approximately 510 Cubic yards of soil contaminated with petroleum hydrocarbons were excavated and disposed off site. The City of San Rafael also provided oversight of the screening of approximately 20,000 cubic yards of surcharge soil. 2 cubic yards were identified as being hazardous waste due to asbestos pipe fragments.

Completed Date :	1990-07-10
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Site Screening

Comments :

ON CORTESE LIST SITE SCREENING DONE THE LANDFILL, 6.14 ACRES, IS OWNED BY THE CITY OF SAN RAFAEL. PUBLIC WORKS DEPT USED IT TO DISPOSE TREE TRIMMINGS, ETC. SOIL ANALYSIS SHOWED LEAD (700 PPM) , ZINC (4700 PPM) IN ISOLATED AREAS. NO LEAD FOUND IN GROUNDWATER SAMPLES. TOLUENE (3.7 PPB) FOUND IN ONE WELL. ALL 5 WELLS HAVE BARIUM & ZINC (UP TO 0.28 PPM & 0.19 PPM RESPECTIVELY). CITY OF SAN RAFAEL IS PROPOSING TO DEV- ELOP THIS SITE. RECOMMEND PRELIMINARY ENDANGERMENT ASSESSMENT, MEDIUM.

WELLS - GAMA - CA
California Groundwater Ambient Monitoring Assessment
State Water Resources Control Board
916-341-5791
Brings together datasets from California state agencies including: Public Health Water Resources and Pesticide Regulation as well as from the US Geological Survey Lawrence Livermore National Laboratory and the Water Boards. It shows results for untreated raw water in different types of wells for naturally-occurring and man-made chemicals.

FLOOD Q3
Flood data
Environmental Protection Agency
(202) 566-1667
Q3 Flood Data

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Better Assessment Science Integrating point & Non-point Sources
U.S. Environmental Protection Agency
855-246-3642
Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

DIGITAL OBSTACLE
Obstacles of interest to aviation users
Federal Aviation Administration
855-379-6518
The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

EPICENTERS
National Geographical Data Center
National Geographical Data Center
303-497-6826
List of recent and historic earthquakes and information.

FLOOD DFIRM
National Flood Hazard Layer Database
Federal Emergency Management Agency
The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMAs Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

Property Archives

City Directory Report

Envirosite's City Directory report is a screening tool designed to assist in evaluating a subject property and possible adjacent properties resulting from past activities. It includes a search and abstract of available city directories and cross reference directories at five year intervals or the closest available intervals. Public map sources are reviewed to determine possible adjoining properties to the front, back, left and right of the property.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

SOURCE:	***YEAR:***
Property Archives	2018, 2015, 2010, 2006, 2002, 1998
Marin-Sonoma & North Bay Criss Cross Directory	1991, 1986, 1981, 1976, 1972

Property Archives is a proprietary and comprehensive database of over one billion commercial and residential records, business names and occupant records for every city and town in the United States. This database is owned by Property Archives, LLC.

This report was prepared by Property Archives, LLC for Envirosite Corporation

SUBJECT PROPERTY:

Sir Francis Drake Boulevard , San Quentin, CA 94964

ADJOINING PROPERTIES:

1200 - 1301 Andersen Dr, San Rafael, CA

565 - 600 Jacoby St, San Rafael, CA

125-300 Sir Francis Drake Blvd, San Quentin, CA

Historical Information Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjoining properties.

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2022 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

The Fox Group, LLC

****CHAIN SEARCH****

July 7, 2022

Mr. Hank Burnham
Property Archives, LLC
512 Randy Point Road
Athens, Georgia 30605

RE: TFG File:T7831/Property Archives: #74023

Dear Mr. Burnham:

The Fox Group LLC title department has completed the Chain search on San Quentin, located at East Sir Francis Drake Boulevard, San Quentin, California 94964.

Should you have any questions or require further assistance, please contact your sales representative at 504-400-0569.

Sincerely,

Vicki Rogerson
Title Specialist

THE FOX GROUP SEARCH RESULTS

CHAIN SEARCH

Subject: **SAN QUENTIN**
EAST SIR FRANCIS DRAKE BOULEVARD
SAN QUENTIN, CALIFORNIA 94964

Public records on the subject real property identified above revealed the following information effective to June 28, 2022:

ASSESSMENT

Location: **Marin County**

Land/Description: Parcel of Land
Parcel No.018-152-12

DEEDS
*

Title Vested To: **State of California**

NOTE: Copy attached as Exhibit "A".

EXAMINER'S NOTE

Public Records of Marin County, California were searched from January 1, 1940 to June 28, 2022, and no deeds vesting title in the subject property were found of record during the period searched.

EASEMENTS

Public Records of Marin County, California were searched from January 1, 1940 to June 28, 2022, and no easements on the subject property were found of record during the period searched.

LEGAL DESCRIPTION

Legal description included on Exhibit "A".

GENERAL COMMENTS

This concludes the investigation on the above captioned. Again, should you have any questions, please feel free to contact your sales representative, (504) 400-0569.

AGREEMENT AND GRANT OF EASEMENT WASTEWATER FACILITIES

THIS AGREEMENT AND GRANT OF EASEMENT is made and entered into by and between the STATE OF CALIFORNIA, acting by and through its DIRECTOR OF GENERAL SERVICES, hereinafter called State, and SANITARY DISTRICT NO. 1 OF MARIN COUNTY, hereinafter called Grantee.

State, pursuant to the provisions of Section 14666 of the Government Code of the State of California, hereby grants unto Grantee, its successors and assigns forever, an easement for wastewater facilities in the County of Marin, State of California, as located and described in the attached Exhibit "A", consisting of two (2) pages, which by this reference is made a part hereof.

I hereby certify that all conditions for exemption set forth in State Administrative Manual Section 1209 have been complied with and this document is exempt from review by the Department of Finance.

PROVIDED, this Grant of Easement is subject to the following terms and conditions:

1. This Grant is subject to existing contracts, leases, licenses, easements, encumbrances, and claims which may affect said real property and the use of the word "Grant" herein shall not be construed as a covenant against the existence of any thereof.

2. Except for those claims arising out of or related to the State's sole negligence, GRANTEE waives all claims against State, its officers, agents, and employees, for loss or damage caused by GRANTEE's exercise of this Easement, and GRANTEE agrees to protect, save harmless, indemnify, and defend State, its officers, agents and employees, from any and all loss, damage or liability, including, without limitation, all legal fees, expert witness or consultant fees and expenses related to the response to, settlement of, or defense of any claims or liability, which may be suffered or incurred by State, its officers, agents and employees caused by or arising out of the exercise by GRANTEE of the rights hereby granted, except those claims or liability arising out of the sole negligence of State.

3. State reserves the right to use said real property in any manner, provided such use does not unreasonably interfere with GRANTEE's rights hereunder.

4. State reserves the right to require GRANTEE, at State expense, to remove and relocate all improvements placed by GRANTEE upon said real property, upon determination by State that the same interfere with future development of State's property. Within 180 days after State's written notice and demand for removal and relocation of the improvements, GRANTEE shall remove and relocate the improvements to a feasible location on the property of State, as designated by State, and State shall furnish GRANTEE with an easement in such new location, on the same terms and conditions as herein stated, all without cost to GRANTEE, and GRANTEE thereupon shall re-convey to State the easement herein granted.

5. This Easement shall terminate in the event GRANTEE fails for a continuous period of eighteen (18) months to use this Easement for the purposes herein granted. Upon such termination, GRANTEE shall forthwith upon service of written demand, deliver to State, at no cost to State, a Quitclaim Deed, to its right, title and interest hereunder. Should GRANTEE fail or refuse to deliver said Quitclaim Deed, State may record, in the Recorder's Office of the County in which said real property is located, a written notice reciting said failure, and such recordation shall, after ten (10) days from the date of recordation of said notice, be conclusive evidence of such termination against GRANTEE. GRANTEE shall, upon State request, without cost to State, and within ninety (90) days from said State request, remove all property placed by or for GRANTEE upon said real property and restore said premises as nearly as possible to the same condition as they were in prior to the execution of this Easement. In the event GRANTEE should fail to restore said premises in accordance with such request, State may do so at the risk of GRANTEE, and all costs of such removal and restoration shall be paid by GRANTEE upon demand.

6. In making any excavation on said property of State, GRANTEE shall make the same in such manner as will cause the least injury to the surface of the ground around such excavation, and shall replace the earth so removed by it and restore the surface of the ground and any improvement thereon to as near the same condition as they were prior to such excavation as is practicable.

7. GRANTEE understands that said Easement is within SQ a state prison, and GRANTEE agrees to abide by certain regulations and restrictions concerning GRANTEE's access to said Easement:
   a. Prior to any entry upon said land for any of the purposes herein set forth, GRANTEE shall notify State by written or oral notice to the authorities in charge of said prison.
   b. GRANTEE shall restrict travel to such roads or routes within said prison as said authorities in charge may reasonably designate.
   c. Use of said roads or routes by GRANTEE shall be restricted to that use reasonably necessary in connection with the construction, operation, maintenance and repair of said water pipeline.
   d. GRANTEE shall not consent to the use of any of said roads or routes by members of the public without approval of State.
   e. Access rights granted by this Easement may be restricted by said authorities in charge in the event that turmoil or emergency conditions are occurring at said prison.

8. GRANTEE agrees to comply with the following conditions:

   a. Use of this Easement by GRANTEE in any manner compromising the security concerns of STATE is not permitted.

b. Unless otherwise modified in writing by the Designated Prison Staff, all of the GRANTEE'S officers, employees, agents, and contractors requiring access to the site shall have security clearance from the Designated Prison Staff. GRANTEE shall obtain the necessary forms from the Designated Prison Staff and submit such forms in the time and manner as directed by said authorities in charge.
c. In the event an emergency develops on GRANTEE'S easement area, GRANTEE agrees to cooperate, with respect to STATE'S security concerns, to allow STATE to respond to such emergency.
d. GRANTEE will comply with all rules and regulations adopted by the Designated Prison Staff. No article or material deemed by the Designated Prison Staff to be considered as contraband shall be brought on said real property. Contraband includes, but is not limited to, beer, alcoholic beverages, narcotics, tobacco, the possession or use of firearms, explosives or edged weapons, and restricted controlled substances. Any willful violation of said rules and regulations are grounds for immediate termination of this Easement, and could result in ejection from Prison grounds and/or in arrest and criminal prosecution.
e. Unless otherwise modified in writing by said authorities in charge, all of GRANTEE'S officers, employees, agents, and contractors allowed by this Easement within said real property shall be prohibited from wearing denim jeans, blue chambray work shirts, orange vests, and any other articles of clothing disallowed by the authorities in charge.
f. GRANTEE shall conduct all activities so as to protect the health, safety, and well-being of those people upon the premises of said STATE facilities.

9. INSURANCE

GRANTEE shall require their contractors provide to STATE a certificate of insurance naming STATE and its officers, agents and employees as an additionally insured entity with amounts of Commercial General Liability of at least ONE MILLION DOLLARS ($1,000,000) per occurrence and Fire and Legal Liability of at least ONE MILLION DOLLARS ($1,000,000) naming the State of California as additional insured.

GRANTEE will insure that the contractor provide a separate writing whereby contractor agrees to the following:

a. STATE shall not be liable for the payment of any premiums or assessments on the insurance coverage required by STATE.
b. The certificate of insurance shall provide that the insurer will not cancel the insured's coverage without thirty (30) days prior written notice to STATE.
c. Contractor agrees that the insurance herein provided for shall be in effect at all times during the term of construction.
d. In the event that said insurance coverage expires or is terminated at any time or times during the term of this agreement, contractor agrees to provide STATE at least thirty (30) days prior to said expiration or termination date, a new certificate of insurance evidencing insurance coverage as provided for herein.
e. In the event contractor fails to keep in effect at all times insurance coverage as herein provided, STATE may, in addition to any other remedies it may have, instruct GRANTEE to immediately terminate contractor's permission to enter upon the occurrence of such event.

10. All notices herein provided to be given to "the Designated Prison Staff" shall be given as set forth below:

San Quentin State Prison
Office of Plant Operations
David Beach, Correctional Plant Manager II, telephone number (415) 454-1460 ext 5079
100 Main Street
San Quentin, CA 94964

Alternate Contact:
Matt O'Byrne, Correctional Plant Supervisor, telephone number ((415) 454-1460 ext 5219
100 Main Street
San Quentin, CA 94964

11. Entry upon said lands of STATE, by GRANTEE for the purposes stated herein, shall constitute acceptance of all terms and conditions of this Permit.

Exhibit A

LEGAL DESCRIPTION
EASEMENTS IN FAVOR OF SANITARY DISTRICT NO. 1 OF MARIN COUNTY

All that certain real property situate in the County of Marin, State of California, being a portion of the lands conveyed to The State of California, as described by deed recorded in Book H of Deeds at Page 365 and Book U of Deeds at Page 598, Marin County Records, and being a portion of LOTS 3 and 5 in Section 14, Township 1 North, Range 6 West as shown upon the Map of Salt Marsh and Tide Lands, Marin County and as more particularly described in the patent thereto from the Board of Tide Land Commissioners to Matthew Crooks recorded December 10, 1875 in Liber "Q" of Deeds at Page 75, Records of Marin County and being a portion of the same property described in the State Patent to John F. McCauley recorded June 2, 1860 in Book D of Deeds Page 206 Marin County Records, and the same property contained in the Deed to John Simms recorded October 25, 1862 in Book D of Deeds Page 438, Marin County Records; being more particularly described as follows:

PARCEL A
SANITARY SEWER FORCE MAIN EASEMENT AND ACCESS EASEMENT

COMMENCING at a found brass disc Standard County Monument on the centerline of Sir Francis Drake Boulevard marking the northwesterly terminus of the course labeled N69°08'33"W, 163.03' as shown on that certain map entitled "SIR FRANCIS DRAKE BLVD. EAST RIGHT OF WAY THROUGH SAN QUENTIN PRISON" File No. 74-45, on file in the Office of the County of Marin Department of Public Works, from which point a found brass disc Standard County Monument marking the southeasterly terminus of said course bears South 69°08'33"East, 163.03 feet; thence leaving said centerline North 87°04'34"West, 169.33 feet to the southerly Right of Way line of Sir Francis Drake Boulevard at the northwesterly terminus of the course labeled N 68°58'03" W, 648.10' as shown upon said map and as described by deed in Exhibit A of that certain AGREEMENT AND GRANT OF EASEMENT recorded August 21, 1972 in Book 2601 of Official Records at Page 301; thence along said southerly Right of Way South 68°58'03" East, 648.10 feet; thence continuing along said Right of Way North 68°16'17"East, 30.00 feet to the TRUE POINT OF BEGINNING; thence leaving said Right of Way, South 76°40'56" East, 136.44 feet; thence South 50°48'27"East, 59.82 feet to the beginning of a curve concave to the southwest, having a radius of 88.00 feet; thence southeasterly along said curve through a central angle of 12°13'02", an arc distance of 18.76 feet; thence South 38°35'25"East, 116.20 feet to the beginning of a curve concave to the southwest, having a radius of 1000.00 feet; thence southeasterly along said curve through a central angle of 00°55'47", an arc distance of 16.23 feet; thence South 37°39'38"East, 283.74 feet to the beginning of a curve concave to the southwest, having a radius of 473.00 feet; thence southeasterly along said curve through a central angle of 21°07'39", an arc distance of 174.42 feet; thence South 16°31'59"East, 231.06 feet to the beginning of a curve concave to the northeast, having a radius of 192.00 feet; thence southerly, southeasterly and easterly along said curve through a central angle of 66°40'45", an arc distance of 223.44 feet; thence South 83°12'44"East, 755.18 feet; thence North 00°00'00"East, 94.74 feet; thence North 41°51'37"East, 134.78 feet to a point hereinafter referred to as POINT "A"; thence North 87°15'59"West, 91.35 feet; thence North 00°02'42"West, 59.29 feet; thence North 88°55'22"East, 66.85 feet; thence North 67°35'10"West, 81.01 feet; thence South 89°19'37"West, 24.50 feet; thence South 00°40'23"East, 139.62 feet to the beginning of a curve concave to the northwest, having a radius of 15.00 feet; thence southwesterly along said curve through a central angle of 33°41'24", an arc distance of 8.82 feet; thence South 33°01'01"West, 21.56 feet to the beginning of a curve concave to the southeast, having a radius of 15.00 feet; thence southwesterly along said curve through a central angle of 33°41'24", an arc distance of 8.82 feet; thence South 00°40'23"East, 20.00 feet to the beginning

of a curve concave to the northeast, having a radius of 15.00 feet; thence southeasterly along said curve through a central angle of 33°41'24", an arc distance of 8.82 feet; thence South 34°21'47"East, 16.32 feet to the beginning of a curve concave to the west, having a radius of 15.00 feet; thence southeasterly, southerly and southwesterly along said curve through a central angle of 59°08'11", an arc distance of 15.48 feet to the beginning of a compound curve concave to the northwest, having a radius of 45.00 feet; thence southwesterly along said curve through a central angle of 72°00'52", an arc distance of 56.56 feet; thence North 83°12'44"West, 670.02 feet to the beginning of a curve concave to the northeast, having a radius of 168.00 feet; thence northwesterly along said curve through a central angle of 28°08'10", an arc distance of 82.50 feet to the beginning of a compound curve concave to the northeast, having a radius of 15.00 feet; thence northwesterly along said curve through a central angle of 39°14'22", an arc distance of 10.27 feet; thence North 15°50'12"West, 14.51 feet to the beginning of a curve concave to the southwest, having a radius of 15.00 feet; thence northwesterly along said curve through a central angle of 33°41'24", an arc distance of 8.82 feet; thence North 49°31'36"West, 20.00 feet to the beginning of a curve concave to the southwest, having a radius of 15.00 feet; thence northwesterly along said curve through a central angle of 34°04'34", an arc distance of 8.92 feet to the beginning of a reverse curve concave to the northeast, having a radius of 15.00 feet; thence northwesterly along said curve through a central angle of 53°26'28", an arc distance of 13.99 feet to the beginning of a compound curve concave to the northeast, having a radius of 168.00 feet; thence northwesterly along said curve through a central angle of 13°37'43", an arc distance of 39.96 feet; thence North 16°31'59"West, 231.06 feet to the beginning of a curve concave to the southwest, having a radius of 497.00 feet; thence northwesterly along said curve through a central angle of 21°07'39", an arc distance of 183.27 feet; thence North 37°39'38"West, 67.06 feet; thence North 37°28'51"West, 475.37 feet; thence North 74°30'52"West, 31.24 feet to said southerly Right of Way line of Sir Francis Drake Boulevard; thence southwesterly along said Right of Way South 68°16'17"West, 115.00 feet to the TRUE POINT OF BEGINNING.

Containing 68,633 square feet, more or less.

Central Marin Sanitation Agency

Resolution No. 194

RESOLUTION OF ACCEPTANCE FOR A RIGHT OF WAY AT SAN QUENTIN PRISON

WHEREAS, Central Marin Sanitation Agency requires a right of way for building and operating an odor control facility at the junction facilities on San Quentin State Prison property; and

WHEREAS, San Quentin State Prison has granted by agreement to Central Marin Sanitation Agency a right of way to build and operate odor control facilities on San Quentin State Prison property.

NOW, THEREFORE, BE IT RESOLVED that the Commissioners of the Central Marin Sanitation Agency do accept the agreement dated July 17, 1995, by the State of California for right of way to San Quentin Prison property for the construction and operation of odor control facilities.

Passed and adopted on November 14, 1995, by the following vote:

Ayes:
Noes:
Absent:

Paul Cohen, Chairman

Attested:

Ronald Hill, Secretary

PROVIDED, this Grant of Easement is subject to the following terms and conditions:

1. This Grant is subject to existing contracts, leases, licenses, easements, encumbrances, and claims which may affect said property and the use of the word "Grant" herein shall not be construed as a covenant against the existence of any thereof.

2. Grantee waives all claims against State, its officers, agents, and employees, for loss or damage caused by, arising out of, or in any way connected with the exercise of this Easement, and Grantee agrees to save harmless, indemnify, and defend State, its officers, agents, and employees, from any and all loss, damage or liability which may be suffered or incurred by State, its officers, agents, and employees ceused by, arising out of, or in any way connected with exercise by Grantee of the rights hereby granted, except those arising out of the sole negligence of State.

3. State reserves the right to use said real property in any manner, provided such use does not unreasonably interfere with Grantee's rights hereunder.

4. State reserves the right to require Grantee, at State expense, to remove and relocate all improvements placed by Grantee upon said real property, upon determination by State that the same interfere with future development of State's property. Within 180 days after State's written notice and demand for removal and relocation of the improvements, Grantee shall remove and relocate the improvements to a feasible location on the property of State, as designated by State, and State shall furnish Grantee with an easement in such new location, on the same terms and conditions as herein stated, all without cost to Grantee, and Grantee thereupon shall reconvey to State the easement herein granted.

5. This Easement shall terminate in the event Grantee fails for a continuous period of 18 months to use this Easement for the purposes herein granted. Upon such termination, Grantee shall forthwith upon service of written demand, deliver to State a quitclaim deed, to its right, title and interest hereunder, and shall, on State request, without cost to State, and within 90 days from written demand by State, remove all property placed by or for Grantee upon said property and restore said premises as nearly as possible to the same condition they were in prior to the execution of this Easement. In the event Grantee should fail to restore the premises in accordance with such request, State may do so at the risk of Grantee, and all costs of such removal and restoration shall be paid by Grantee upon demand.

6. Grantee understands that said Easement is within California State Prison at San Quentin, a state prison, and Grantee agress to abide by certain regulations and restrictions concerning Grantee's access to said Easement:

   a. Prior to any entry upon said land for any of the purposes herein set forth, Grantee shall notify State by written or oral notice to the authorities in charge of said prison.

   b. Grantee shall restrict travel to such roads or routes within said prison as said authorities in charge may reasonably designete.

   c. Use of said roads or routes by Grantee shall be restricted to that use reasonably necessary in connection with the construction, operation, maintenance and repair of said sanitary sewer facilities.

   d. Grantee shall not consent to the use of any of said roads or routes by members of the public without approval of State.

   e. Access rights granted by this Easement may be restricted by said authorities in charge in the event that turmoil or emergency conditions are occurring at said prison.

Interview with Local Officials

Date: June 24,2022

Name: Meaghan Pang

Title: Administrative Assistant, Central Marin Fire

Interviewed by: Amy Robson, Cameron-Cole, LLC

Cameron-Cole contacted the Central Marin Fire via email on June 24, 2022 requesting records pertaining to the registration, use, storage, or handling of hazardous substances or petroleum products, including storage tanks associated with the subject property. A response was received indicating no records were found in association with the subject property and to contact Marin County for further information.

Date: June 24,2022

Name: Marin County Online Public Records Request

Request by: Amy Robson, Cameron-Cole, LLC

Cameron-Cole contacted the Marin County via online records request on June 24, 2022 requesting records pertaining to the registration, use, storage, or handling of hazardous substances or petroleum products, including storage tanks associated with the subject property. A response was received with a record containing information regarding the installation of the hydrogen peroxide injection system with the CMSA sewer easement.

APPENDIX F

Professional Qualifications

Qualifications of Professionals

Amy Robson, Geologist

Ms. Robson is a Geologist with Cameron-Cole for three years. Ms. Robson performs environmental field sampling including collection of groundwater samples from monitoring wells, collection of surface and subsurface soil samples, logging boreholes for lithology, performing well tests, and assisting with data analysis and development of presentations. She also prepares technical reports and presentations.

Education:	B.S. in Geology, California State University, Chico, California, May 2019
	ASTM International Standard Practice E1527-21 Training Course for Phase I and Phase II Environmental Site Assessments
Certifications:	Geologist-In-Training Certificate
	40-hour Hazardous Waste Operations and Emergency Response Training
	8-hour HAZWOPER Refresher

Mike Stephenson, Principal Scientist/Regional Manager

Mr. Stephenson serves as Principal Scientist and manages the western region operations of Cameron-Cole. He has over 25 years of professional experience as an environmental consultant and risk manager. He has been professionally employed as environmental consultant since 1995 and has been a Regional Manager for Cameron-Cole since 2014. As a Regional Manager, he has successfully assembled, directed, and managed teams of environmental professionals responsible for execution of a diverse portfolio of environmental consulting projects principally involving assessment & remediation of contaminated properties. Mr. Stephenson has broad experience with site assessment, human health risk assessment and environmental risk management. He has extensive experience in performance of Phase I and Phase II Environmental Site Assessments in accordance with ASTM International Standards and 40 CFR 312 All Appropriate Inquiry. He has conducted or supervised subsurface investigations at hundreds of contaminated properties throughout the country. He also has extensive experience with developing risk based cleanup levels and implementation of complex remediation strategies.

Education:	B.A. Environmental Studies, University of California – Santa Barbara
	M.B.A. St. Mary's College of California
Certifications:	Environmental Risk Manager, International Institute of Risk Management

1. INTRODUCTION

PURPOSE

Cameron-Cole, LLC (Cameron-Cole) has completed a Limited Phase II Environmental Site Assessment (ESA) for the approximately 8.3-acre property located in San Quentin, Marin County, California. The assessment was performed in accordance with Cameron-Cole's scope of services dated July 22, 2022 authorized by First Carbon Solutions on August 8, 2022 on behalf of Eden Housing and Education Housing Partners. A Phase I ESA prepared by Cameron-Cole for the property in July 2022 identified recognized environmental conditions (RECs) in connection with the property. Historical research indicates that the majority of the property has never been developed but was used as a gun range in the 1970s. Given the use of lead ammunition associated with the historical gun range and no records of remediation, it is assumed lead is still present in soil within the property. The Phase I ESA identified the former gun range as a recognized environmental condition (REC).

The purpose of this Phase II investigation was to evaluate potential environmental impacts associated with the former presence of the gun range previously located on the property.

SITE LOCATION AND HISTORY

The 8.3-acre Subject Property (the property) is owned by the State of California and was operated by San Quentin State Penitentiary. The property is located 100 feet north of San Francisco Bay, along Sir Francis Drake Boulevard, and 3,400 feet west of San Quentin State Penitentiary (Figure 1). It is characterized as steep slopes from the west, north, and east towards the center. The central and southwest portions of the property are generally flat with a paved asphalt lot located near the entrance (Figure 2). The property has a mixture of tall trees with brush and shrubs up to approximately ten feet above ground surface with some tall grasses and thickets. In 1983, the State of California entered in an easement agreement with the Central Marin Sanitation Agency (CMSA) for the installation of a wastewater pipeline to be installed. The pipeline runs in a southwest-northeast direction, entering the property at the southwest corner, near Sir Francis Drake Boulevard. At this corner, a hydrogen peroxide odor control facility was built at the sewage junction pad in 1995 as part of the easement agreement.

Based upon review of historical documents and interviews with personnel knowledgeable in historic site operations, the two pistol ranges were located in the southwest and central area of the property (Figure 3). The upper pistol range is approximately 10 feet above the lower pistol range, separated by a concrete retaining wall. Firing at both pistol ranges was presumed to occur towards the northeast, toward the hillside. A concrete bunker is located to the northeast of the ranges but is not included within the property boundaries (Figure 2).

GEOLOGY

The property is located within the Central Coast Range Geomorphic Province adjacent to the San Francisco Bay. Geologic mapping (Sloan, 1997) indicates that this region is underlain by the Franciscan complex mélange, dominated by greywacke sandstones, shales, and conglomerates which have been subjected to low grade metamorphism and quaternary bay mud deposits. Based on nearby well data, groundwater levels are estimated to be approximately 9 to 13 feet above mean sea level (3 to 6 feet below ground surface [ft bgs] at the flat central portion of the property).

2. SUBSURFACE INVESTIGATION

SOIL ASSESSMENT

On August 11 and 12, 2022, Cameron-Cole personnel were on-site to collect soil samples. A total of 11 soil borings were advanced using a stainless steel hand auger to depths of approximately 2.5 feet below ground surface (bgs). Samples were collected at three up-range locations (BG-1, BG-2, and BG-3) to establish background concentrations of lead in the soil. Along the northern side of the range, the assumed firing direction, samples were collected at eight locations (lower pistol range: SB-1A through SB-1D, upper pistol range: SB-2A through SB-2D). Figure 2 depicts the approximate locations of the soil borings. Sample designations are based on the sample location name and the depth the samples were collected.

Soil samples were collected at 0 to 0.5 ft bgs and at 2 to 2.5 ft bgs. Soil was described using the unified soil classification system (USCS) including estimates of grain size, color and moisture content. Samples were extracted from the auger and placed in glass jars according to the laboratory specifications. Sampling equipment was decontaminated prior to and between each sampling collection. Samples were submitted to Eurofins Test America for analysis of California Administrative Manual 17 metals (CAM 17) by Environmental Protection Agency (EPA) Methods 6010B or 7471A. Soil borings did not intersect with groundwater and each boring was abandoned by backfilling the hole with drill cuttings generated during the boring advancement.

3. LABORATORY ANALYTICAL RESULTS

SOIL SCREENING RESULTS

A summary of metals detected in the August 2022 soil boring samples is presented in Table 1. A map depicting the lead distribution detected in the soil boring samples at the property is presented in Figure 3. Copies of the laboratory analytical reports and associated chain-of-custody records can be found in Appendix A.

Review of the results indicates that lead concentrations are detected in all sample locations. In general, the concentrations of lead were significantly higher in surface samples than in two-foot samples, which is the expected pattern with lead fragments deposited at a firing range. This pattern was not present in the background samples. Lead concentrations in background samples ranged from 14 to 88 milligrams per kilogram (mg/kg), which is within the range of background concentrations in California soil (12.4 mg/kg to 97.1 mg/kg) (Kearney, 1996). Background lead concentrations were exceeded in sample BG-3-2. The down-range samples exceeded the Direct Exposure Human Health Risk Residential environmental screening levels (ESLs) (80mg/kg) at SB-1A-S/-2, SB-1C-S/-2, SB-2A-S/-2, SB-2B-S, SB-2C-S/-2, and SB-2D-S/-2. The highest lead concentrations were detected in the western-most sample location (SB-1A-S) at 730 mg/kg and the eastern-most sample location (SB-2C-S) at 430 mg/kg.

Concentrations of nickel, arsenic, and vanadium in excess of the ESL were observed in several samples across the site. The concentrations of each metal were consistent with the background concentrations and likely not related to use of the pistol range.

4. QUALITY ASSURANCE AND QUALITY CONTROL (QA/QC)

One field blank and one equipment blank were collected during the investigation. A field blank is collected using de-ionized water obtained from the lab that is poured directly into a sampling container onsite. Field blanks are used to detect ambient contamination associated with the site. A field blank (FB-01) was collected prior to collection of the first soil sample and accompanied the samples at all times. The field blank was analyzed for CAM-17 by EPA 6010B and results are included in Appendix A. No metals were detected in the field blank.

Equipment blanks are collected by pouring laboratory-provided de-ionized water over sampling equipment. The equipment blank is used to evaluate decontamination effectiveness and potential cross-contamination. One equipment blank was collected from the hand auger in between sampling locations. The equipment blank was analyzed for CAM-17 by EPA 6010B and results are included in Appendix A. No metals were detected in the equipment blank.

5. CONCLUSIONS AND RECOMMENDATIONS

The results of the Phase II investigation revealed that lead exceeded direct exposure ESLs at soil borings SB-1A, SB-1C, SB-2A, SB-2C, and SB-2D (at the surface and at 2 ft bgs), and in the SB-2B surface sample. Lead concentrations were elevated in the down-range surface sample locations, supporting the assumption that the pistol range firing direction was toward the hillside to the north. While arsenic, nickel, and vanadium exceeded the ESL, the concentrations are consistent with naturally-occurring concentrations in background samples and likely unrelated to the pistol range.

Based on preliminary property development plans, the former pistol range target areas are within the future soil disturbance area. As noted previously, the highest concentrations of lead were observed in the western-most and eastern-most soil boring locations. Due to the orientation and size of the pistol ranges, it is unlikely that lead contamination extends a significant distance from those boring locations, but further characterization may be warranted. Prior to property development, it is recommended that a soil management plan be developed to properly segregate, test and dispose of soil potentially contaminated with lead in the former pistol range target area (Figure 4).

Introduction

This Soil and Groundwater Management Plan (SGMP) is being prepared by Cameron-Cole, LLC (Cameron-Cole) and First Carbon Solutions on behalf of Eden Housing and Education Housing Partners for the planned Oak Hill Apartment site in Marin County (Figure 1, the Site). A Phase I Environmental Site Assessment (ESA) prepared by Cameron-Cole for the property in July 2022 identified recognized environmental conditions (RECs) in connection with the property. Historical research indicated that the majority of the property has never been developed but was used as a gun range in the 1970s. Given the use of lead ammunition associated with the historical gun range and no records of remediation, it was assumed lead is still present in soil within the property and the gun range was identified as a REC.

AECOM conducted a Phase II ESA in March 2022 to assess soil and groundwater conditions at the Site (AECOM, 2022). AECOM was unable to access the assumed gun range target area and the investigation results from other portions of the Site did not conclusively identify any gun range impacts in soil. Cameron-Cole conducted a Phase II ESA (the investigation) around the former gun range in August 2022 after vegetation was cleared from the assumed target area. The investigation identified lead impacts in soil in the central portion of the Site (Figures 2-4). Based on the findings of the investigation, it was recommended that an SGMP be developed to properly segregate, test and dispose of soil and groundwater potentially contaminated with lead.

This SGMP describes procedures for removing, testing and disposing of soil impacted by historic gun range activities on Site. It will also provide a dust control plan and procedures for segregating and testing soil if previously unidentified contamination is discovered during Site development.

Site Location and History

The 8.3-acre Site is owned by the State of California and was operated by San Quentin State Penitentiary. The property is located 100 feet north of San Francisco Bay, along Sir Francis Drake Boulevard, and 3,400 feet west of San Quentin State Penitentiary (Figure 1). It is characterized as steep slopes from the west, north, and east towards the center. The central and southwest portions of the property are generally flat with a paved asphalt lot located near the entrance. The property has a mixture of tall trees with brush and shrubs up to approximately ten feet above ground surface with some tall grasses and thickets. In 1983, the State of California entered in an easement agreement with the Central Marin Sanitation Agency (CMSA) for the installation of a wastewater pipeline to be

installed. The pipeline runs in a southwest-northeast direction, entering the property at the southwest corner, near Sir Francis Drake Boulevard. At this corner, a hydrogen peroxide odor control facility was built at the sewage junction pad in 1995 as part of the easement agreement.

Based upon review of historical documents and interviews with personnel knowledgeable in historic Site operations, the two pistol ranges were located in the southwest and central area of the property. The upper pistol range is approximately 10 feet above the lower pistol range, separated by a concrete retaining wall. Firing at both pistol ranges was presumed to occur towards the northeast, toward the hillside. A concrete bunker is located to the northeast of the ranges but is not included within the property boundaries (Figure 2).

Geology

The property is located within the Central Coast Range Geomorphic Province adjacent to the San Francisco Bay. Geologic mapping (Sloan, 2006) indicates that this region is underlain by the Franciscan complex mélange, dominated by greywacke sandstones, shales, and conglomerates which have been subjected to low grade metamorphism and quaternary bay mud deposits. Based on nearby well data, groundwater levels are estimated to be approximately 9 to 13 feet above mean sea level (3 to 6 feet below ground surface [ft bgs] at the flat central portion of the property). However, during the initial Phase II investigation, AECOM did not encounter groundwater in borings advanced to 10 and 15 ft bgs.

Extent of Contamination

A map depicting the lead distribution detected in the soil boring samples at the property is presented in Figure 4. In general, the concentrations of lead were significantly higher in surface samples than in two-foot samples, which is the expected pattern with lead fragments deposited at a firing range. The down-range samples exceeded the Direct Exposure Human Health Risk Residential environmental screening levels (ESLs) (80mg/kg) at SB-1A-S/-2, SB-1C-S/-2, SB-2A-S/-2, SB-2B-S, SB-2C-S/-2, and SB-2D-S/-2. The highest lead concentrations were detected in the western-most sample location (SB-1A-S) at 730 milligrams per kilogram (mg/kg) and the eastern-most sample location (SB-2C-S) at 430 mg/kg. Lead concentrations in background samples were within the range of background concentrations in California soil (12.4 mg/kg to 97.1 mg/kg) (Kearney, 1996).

Remedial Action Objectives and Procedures

Prior to redevelopment of the Site, lead-contaminated soils at and above the ESL (the cleanup goal) will be excavated and disposed of at an appropriate landfill facility. Since lead is the primary constituent of concern in Site soil and the primary constituent detected above screening levels during the investigation, confirmation samples will be analyzed for lead-only. Other trace metals from gun range activities may be present but are very unlikely to be found in significant concentrations without lead. The proposed soil cleanup goal for the Site will be the Direct Exposure Human Health Risk Residential ESL for lead (80 mg/kg).

The approximate excavation footprints and depths are based on the investigation results and presented in Figure 3. As shown in the figure, the excavation footprints include the rectangular target areas for each gun range. The investigation did not identify significant lead contamination in the 2-2.5 foot samples. Therefore, the proposed excavation depth is two feet below ground surface. The excavation area and depth may be expanded based on confirmation soil sample results. However, the excavation depths are not expected to exceed four feet and groundwater is not expected to be encountered. The current proposed excavation volume is approximately 500 cubic yards.

Stockpiles of excavated, impacted soil will be managed in a fashion to minimize dispersal and exposure to the air or underlying soil. Heavy duty plastic sheeting will be placed underneath the soil and plastic sheeting will cover the stockpile at all times, except when the soil is being handled. The sheeting covering the stockpile will be adequately secured with sand bags or by other means to prevent the sheeting from becoming dislodged by wind. Berms or equivalent will be constructed around the stockpile to control precipitation run-on and run-off.

Soil Confirmation Sampling

During and/or after excavation of soils at the Site, confirmation soil samples will be collected from the sidewalls and bottom of the excavation areas. The confirmation sampling and analysis will be conducted to confirm that the soil cleanup goal has been met. For each excavation area, one sidewall sample will be collected for every 50 feet of excavation sidewall and one bottom sample for every 300 square feet of excavation bottom.

Confirmation soil samples will be collected directly from the excavation bottom and sidewalls assuming the depth of the excavation does not exceed four feet. If the depth of the excavation exceeds

four feet, samples will be gathered by an excavator and sampled from the excavator bucket. Confirmation soil samples will be collected using appropriate methods to preserve the integrity of the soil sample. Upon collection, the samples will be placed on ice pending transport to a California-certified laboratory, following chain-of-custody protocol. Each sample will be labeled with a unique sample number, sample date and time, and the sampler's initials. Confirmation soil samples will be analyzed for lead by United States Environmental Protection Agency (EPA) Method 6010B.

Confirmation soil sample results will be compared to the Direct Exposure Human Health Risk Residential ESL (soil cleanup goal). If any sample results exceed the soil cleanup goal, the excavation area will be expanded by at least one additional foot vertically (exceedance in bottom sample) or five feet laterally (exceedance in sidewall sample) in the area of the exceedance, and another set of confirmation samples will be collected from these newly exposed soils to determine if the cleanup goals have been met.

Soil Waste Stockpiling and Waste Characterization

Excavated soil will be managed in accordance with applicable regulations and health and safety requirements. The soil will be stockpiled and managed under the supervision of an OSHA 40-hour HAZWOPER-trained individual.

Whenever possible, soil stockpiles will be located in close proximity to the work area or the ultimate disposition area as practicable within the property to reduce transport distances. Alternatively, excavated soil may be live loaded into dump trucks or placed in rollaway bins with securable lids. The soil in the stockpiles or bins should be free of vegetation, visqueen, and other debris for disposal purposes. Otherwise, disposal facilities may reject the soil.

At a minimum, the following procedures will be followed for stockpiling soil:

- Stockpiles will be covered with plastic sheeting to prevent fugitive dust emissions and exposure to rain at the end of every workday or whenever loading or unloading operations are not being conducted.
- The stockpile covers will be secured by placing rocks, sandbags, or other material in enough quantity so that the covers remain in place during high winds.

- A perimeter berm will be installed around the stockpiles to reduce erosion from rain and storms. The berm will consist of hay bales or wattles placed beneath the plastic sheeting.
- Covers and perimeter berms will be secured in-place when not in use and at the end of each workday, or as necessary to prevent fugitive dust emissions or stormwater runoff.
- In addition to the berms, additional best management practices may include diversion of drainage from the stockpiles, installation of silt fencing/straw bale filter barriers on the down gradient toe of the stockpile slope.
- Stockpiles will be inspected periodically and at least weekly to ensure dust control and runoff control measures are functioning adequately and as specified in the appropriate plans.
- Accumulation dates will be maintained in a field notebook for waste stored on-site in stockpiles including the date of placement and a general description of the location of excavation.
- Covered roll-off bins or drums may also be used to temporarily store wastes, including liquids and any waste that may be characterized as hazardous waste. Profiled hazardous wastes, if any are identified during waste characterization activities, will not be stored on the Site for longer than 90 days.

Soil waste will be stockpiled on Site until a waste profile is developed and a disposal facility agrees to accept the waste. Alternatively, a waste profile from the excavation area may be developed in advance and soil may be live loaded into dump trucks. The disposal facility will be selected by the generator of the waste. The selected disposal facility may have sampling requirements that differ from those listed in this document. At a minimum, one 4-point composite sample will be collected for analysis for every 1,000 cubic yards of stockpiled waste, and one individual sample for California Administrative Manual 17 (CAM 17) metals analysis for every 250 cubic yards. The waste stockpile sample results will be sufficient for defining waste characteristics and preparing generator certification.

Relatively undisturbed waste samples will be collected from the stockpile, after removing the top six inches of waste. Samples will be collected using appropriate methods to preserve the integrity of the sample for waste characterization of the stockpile. Upon collection, the samples will be immediately placed on ice pending transport to a California-certified laboratory, following chain-of-custody protocol. Each sample will be labeled with a unique sample number, sample date and time, and the sampler's initials. Waste samples will be analyzed for constituents required by the receiving disposal

facility through the profile certification processes. At minimum, all waste samples will be analyzed for the following:

- Oil, diesel, and gasoline-range organics by EPA Methods 8015M/8260B,
- Volatile organic compounds (VOCs) by EPA Method 8260B, and
- Metals (CAM 17) by EPA 6010B/7471.

The sample for VOC analysis will be collected in accordance with EPA Method 5035, using the Terra Core® sampling methodology and preservation, or equivalent. As determined by the disposal facilities, the samples may require additional analysis through federal and/or state leaching procedures for waste classification. Once the waste profile has been completed and obtained facility approval, the generator will review, approve and sign all waste profile and manifest documents.

The amount of soil stockpiled on Site will be estimated and recorded by onsite personnel. These mass estimates will be used to confirm weigh tickets generated at the receiving disposal facility. All waste manifests will be signed by the generator and will accompany the load of material to the disposal facility.

Dust Control Measures

Soil excavation and Site development activities have the potential to generate fugitive dust emissions. Soil handling operations normally generate airborne dust which includes particulate matter smaller than or equal to 10 microns. Inhalation of fugitive dust in outdoor air generated during earthwork activities at the Site is therefore a consideration for construction personnel and nearby residents.

The potential sources of dust emissions include construction traffic, excavation activities, soil stockpiles, and grading. Dust increases with wind, which can cause dust particles to dislodge from the soil and disperse.

Dust control measures will be implemented during excavation activities at the Site to mitigate the dust generation, minimize construction worker exposure to dust, and to prevent off-site migration of dust. The following methods will be employed to manage fugitive dust emissions:

- Water will be misted or sprayed to minimize dust generated during soil relocation. Water will be used to maintain soil moisture prior to soil handling. A water truck will be dedicated for this purpose. A fire hose with a proper backflow devise attached to a local hydrant may also be used.

- Loader bucket drop heights will be minimized and loads will be emptied slowly.
- Stockpiled soils will be stabilized with dust palliative or covered with Visquene or similar heavy-duty plastic sheeting (8-mil or greater thickness) at the end of each workday.
- If sustained strong winds are present, excavation and other earthmoving activities will cease or decrease until dust is no longer visible.
- The areas subject to soil disturbing activities on the Site should be limited to one at a time during high wind events.
- Vehicle speeds will be restricted to 10 miles per hour.
- Vehicle access will be confined to established haul routes within the property. If unpaved, the vehicle paths will be wetted.
- Installation of gravel access pads or wheel wash stations at all egress points to prevent tracking of soil onto paved roads, plus periodic sweeping of paved roads within the construction site with wet sweepers.
- A telephone number will be posted at the Site entrances for observers to report visible windblown dust plumes originating on the property during inactive periods, such as weekends, holidays, or other times equipment and personnel are not present at the property. An "on-call" person would receive the call and mobilize with mitigation crews to cease visible dust plumes. The mitigations measures would continue until the plume is minimized or eliminated.

Groundwater Management

During the AECOM Phase II ESA, borings were advanced to 10-15 ft bgs and no groundwater was encountered. Based on the depth of groundwater and the significant attenuation of lead concentrations in soil between the surface samples and 2 ft bgs samples in the source area, it is very unlikely that lead-contaminated groundwater is present beneath the Site. However, no direct sampling of groundwater at the Site has been conducted.

Site development plans require subsurface construction to depths at which groundwater may be encountered and dewatering may be required. If dewatering effluent is generated during development, it should be pumped into holding tanks for testing and to allow suspended solids to settle. Sampling will be conducted in accordance with a National Pollutant Discharge Elimination System (NPDES) permit or a publicly owned treatment works (POTW) permit. If not already required by permit

conditions, the effluent will also be sampled for total lead. Once discharge requirements are met, effluent may be discharged directly to the storm drain with an NPDES permit or to the sanitary sewer with a POTW permit. If detected concentrations exceed the direct discharge permit limits, effluent may be treated and resampled. Alternatively, effluent exceeding direct discharge permit limits may be disposed of at a licensed off-Site disposal facility. If off-Site disposal is necessary, additional sampling may be required to comply with the requirements of the receiving facility.

Waste Management and Hazard Identification

The potential exists for encountering unanticipated conditions and underground structures during soil excavation and Site development activities. Though not expected based on the Site history, buried objects including barrels, drums, containers, or other underground structures of potential concern, and/or visual or olfactory evidence of contamination could be encountered.

This section establishes protocols for the initial response to the discovery of an unanticipated condition, notification protocols, and a path forward such that development activities can continue safely. The primary purposes of these protocols are to:

- Provide the initial required response and notification of the discovered condition.
- Prescribe the collection and analysis of initial samples.
- Provide regulatory agencies with initial sampling data, documents proposing further work if needed, and document actions taken, when complete.

Initial Response Procedures

If unexpected subsurface structures of potential concern and/or visual or olfactory evidence of contamination are encountered, notification and health and safety procedures will be invoked, and work will proceed in accordance with the protocols described herein.

Upon initial discovery, all work will stop in the area near the subsurface structure or unexpected zone of contamination. If warranted, the area will be secured with barricades or fencing, and plastic sheeting plus signage as appropriate to prevent unauthorized access to the area.

An OSHA 40-hour HAZWOPER-trained field engineer or geologist will be notified to start field screening and physical observation of the affected soil or other unanticipated condition. Initial

measures may include conducting field monitoring by taking organic vapor readings using portable field screening devices such as a photoionization detector (PID) if there is reason to believe that VOCs are present. In accordance with the site-specific health and safety plan, appropriate measures will be undertaken to ensure worker safety in areas where unexpected conditions are encountered, including making a determination of the level of Site security and adequate Personal Protection Equipment.

Bullets or Shell Casings

The most likely signs of contamination to be encountered outside of the planned excavation area during Site development would be bullet fragments or shell casings. If these signs are encountered during Site development, the initial response procedures listed above will be initiated. Additional sampling and assessment will be completed to determine the extent of the contamination. If soil excavation is deemed necessary, soil will be excavated, stockpiled, profiled and disposed of in accordance with the procedures listed above.

Sumps, Drums or Vaults

There is no evidence to suggest that sumps, drums or vaults have ever existed on-site. In the unlikely event that a sump and/or vault is discovered during demolition and grading activities, the field engineer or geologist will be notified and the initial response procedures described above will be initiated. Marin County will be notified and appropriate permits will be obtained prior to removing a sump, drum or vault. If liquid is present within the sump, drum or vault, the liquids will be contained, sampled, and analyzed to determine how to properly disposal of the liquid. If stained soil or odors are noted, plastic sheeting will be placed over the affected area until an inspection can be performed to determine the appropriate action to be taken. A PID will be used to measure organic vapor concentrations and assess whether additional health and safety precautions should be taken.

Soil sampling will be performed from the bottom and sidewalls of the excavation and analyzed for petroleum hydrocarbons, VOCs, metals and/or other suspected contaminants based upon field observations and in consultation with Marin County. If the soil sampling results exceed ESLs, additional soil samples may be required.

Liquid Management

If subsurface features such as pipelines, sumps, drums, or vaults containing free phase petroleum hydrocarbons or other liquids are encountered, the liquids shall be contained either in the structure or, if leaking, via spill control methods such as absorbent material and pumping to an above ground storage tank. A PID will be used to measure organic vapor concentrations and determine whether additional health and safety precautions should be taken.

Liquid and absorbent material will be disposed of and impacted soil will be excavated and stockpiled or stored in a drum or watertight bin for testing and off-site disposal. Confirmation soil samples will be collected to confirm that impacted soil has been removed. Analytical protocols will likely include analysis of petroleum hydrocarbons and VOCs. Additional testing requirements will be determined in consultation with Marin County.

Odor Management

If petroleum or VOC odors are encountered during demolition or removal of unexpected subsurface structures the following odor control measures will be implemented:

- Limiting the area of open excavations.
- Covering soil piles or open excavations with tarps and other covers.
- If needed, limiting soil excavations or truck loading to times when meteorological conditions are conducive to conducting operations and the predominant wind direction does not direct odors off-site.
- Spraying water or water containing a non-toxic biodegradable deodorizer, odor suppressing foam, or other odor mitigating agents (such as Simple Green, ODEX, or BioSolve) onto exposed soil during excavation and loading.
- Use of spray or misting systems around the work area.

Imported Soil Management

If imported fill is required, soil will be tested in advance following the guidelines of the DTSC Information Advisory, Clean Imported Fill Material (DTSC 2001).

Completion Report

At the conclusion of earth moving and dewatering activities, a report documenting compliance or identifying discrepancies with this SGMP will be prepared. The completion report will include estimates of soil volume removed, figures depicting excavation extents, extracted groundwater volumes, all waste characterization and soil confirmation sampling results, waste manifests and a general narrative describing excavation and dewatering activities.

Schedule

All excavation, profiling and disposal of the lead-impacted soil near the former gun range target area is planned to occur prior to Site development. Site development is tentatively planned to begin in Fall 2023.
