

MARIN COUNTY FLOOD CONTROL & WATER CONSERVATION DISTRICT

**Corte Madera Creek Flood Risk Management Project
Request for Qualifications and Proposal for
Alternatives Study and Preliminary Design Update
Amendment 1 – Issued September 4, 2026
Robin Bartlett, Assistant Director** *RNS*

The District has received several requests for clarification from interested parties with regard to exclusion of firms that have previously worked on projects with the Ross Valley watershed for the District.

The purpose of exclusion is to ensure that the District obtains fresh input from firms that are able to take impartial review of existing data and previous concepts to develop the revised design.

The District would like to clarify by amending the Request for Qualifications and Proposal with the following language changes:

Page 7 of 18, Section 2. Background, last paragraph, the previous wording as follows to be deleted:

~~Firms, including their subcontractors, that have previously worked on projects within the Ross Valley watershed for the District or other entities are not eligible to be considered for this project.~~

And, the above deleted wording, replaced with the following wording:

Consultants that have served as the lead designer, or reviewer, of the Corte Madera Creek Flood Risk Reduction or San Anselmo Flood Risk Reduction projects, and their subconsultants with regard to design of the fish ladder elements or hydrology and hydraulic modeling and analysis, are not eligible to be considered for this current project effort.
