General Notes

Being the Lands of Hollywood Forever, Inc. As described in DN 2005-0017800, Marin County Records and the Lands of TYO, LLC As Described in DN 2022-0012885, Marin County Records; Also Shown And Delineated On That "Record of Survey" Filed Dec. 29 1978 in Book 15 of Surveys, at page 43, Marin County Records. County of Marin, State of California

Features shown hereon are existing as of the date of the field surveys performed by Adobe Associates, Inc.

Utilities shown hereon are based upon physical features observed at the time of this survey, such as paint markings, overhead wiring, utility poles, and utility boxes. For the location of under ground utilities, a subsurface utility locating company should be contacted.

Underground drainage pipes shown hereon are based upon existing area drains and storm drain piping visible therein. No drainage plans have been reviewed during the preparation of this mapping and the underground location of storm drain piping has not been verified.

Contours shown hereon are a 5' (five foot) vertical interval and are shown based upon LiDAR and can be found on <https://coast.noaa.gov>.

NOTE:
1) An Easement and right of way from the Sausalito Land & Ferry Company granted to Radio Corporation of America recorded April 14, 1933 in Book 262 of Official Records at Page 39, and modified and granted to RCA Communications, Inc. and Radio Corporation of America on October 30, 1936 in Book 331 of Official Records at Page 133, both Marin County Records are not accurately locatable of record (described roughly 100 years ago) and the line of poles to be constructed have not been found, as described therein, during the course of performing this survey. It is presumed likely that the line of poles would have followed roughly along the existing ridge line and trail following the said ridge line.

20 Existing dirt path/trail undefined of record. An "Easement Agreement" was recorded in DN 95-026879 describing a then existing "dirt road" as the only access to the lands to the south now owned by the "United States of America" by Grant Deed DN 2001-0015728, which document includes the "Easement Agreement". No evidence has been located that the terms of item "D" of the "Easement Agreement" have been completed. It stipulated the "exact location of the Easement Property will be determined by a licensed land surveyor". Therefore it's the opinion of this survey that the location of the easement referred to cannot be accurately located of record and is therefore is not shown on this map. The existing path/trail is the only evidence of access from Donahue Avenue to the lands to the south. This path/trail is approximately 10 feet wide.

GENERAL SURVEY NOTES:

- 1)

Tamalpais Avenue shown hereon was created by "The Original Map of the Sausalito Land and Ferry Company" recorded April 6, 1869 in Rack 1, Pull 9, Marin County Records together with a simultaneous recording April 6, 1869 of a separate document recorded in Book H of Deeds at Page 343, Marin County Records. This document states, in part, "hereby grant and dedicate (all the Streets, Avenues, Roads and ways laid down...to public use". No acceptance was included as part of that document.
- 2)

The "Section Map No. 1 of the Sausalito Cemetery" recorded September 15, 1892 (R-2 hereon) shows a portion of "Tamalpais Avenue" lying along the southeasterly side of the cemetery showing bearings and distances along the centerline of the avenue and calling for a 60 foot width. This map was surveyed by Geo. W. Doherty with revisions by Geo. M. Dodge in June 1892. "Record of Survey" recorded August 14, 1973 in Book 11 of Surveys at Page 91, Marin County Records (R-4 hereon) continues this alignment of the northerly portion of Tamalpais Avenue shown on this map. This "Record of Survey" by Joseph Grippi, LS 3775 mentions "a retracement of the centerline of Tamalpais Ave. from "Cathy notes" and a "J.C.O field book 529-51 Survey 10042 (on file at Engineering Field Services)". These documents have not been located or recovered for this survey. The northerly portion of Tamalpais Avenue has been retraced from the Grippi Record of Survey (R-4 hereon).
- 3)

"Record of Survey" recorded December 29, 1978 in Book 15 of Surveys at Page 43 (R-6 hereon), shows some dimensioning of Tamalpais Avenue for the length shown on this map. The alignment of Tamalpais Avenue between that shown on R-4 hereon and the alignment shown along Tamalpais Avenue along the "G.G. Nat.. Rec. Area" numbers 196-209 were accepted, due to the lack of recovery of "Dodge's Notes". The line shown as the easterly line of a portion of Lots 1 & 2, Block 190 was not held as correctly showing that portion identifying "Parcel 1" in DN 2005-0017800, D-3 hereon.
- 4)

"Record of Survey" recorded February 7, 1985 in Book 19 of Surveys at Page 90, Marin County Records (R-7 hereon) shows Tamalpais Avenue through the site without dimensioning and shows the easterly line of "Lot 1" & "Lot 2" also not accepted as the correct line identified as "Parcel 1" in DN 2005-0017800, D-3 hereon.
- 5)

"Record of Survey" recorded September 6, 2005 in Book 2005 of Maps at Page 242, Marin County Records (R-12 hereon) shows all of Tamalpais Avenue through this site and monumenting of the northerly line with "1/2" rebar and cap, LS 6784" and the easterly line of "Parcel 1 of Doc. 2005-17800". This map does not show the government monuments along the southerly line of Tamalpais Avenue, and the easterly line of that portion of "Lot 1", "Lot 2", Block 190 as shown and monumented, and was not accepted as marking the correct position as reconstructed from found monumentation on this survey.
- 6)

The BLM Field Notes for the Boundary of Golden Gate National Recreation Area (D-2 hereon) and the found monuments as described therein were used to reconstruct the southerly boundary of Tamalpais Avenue. The Field Notes state, "From Angle Pt. Nos. 196-212 the bdy. follows the southeasterly side of Tamalpais Ave." The center line of Tamalpais Ave. is reestablished by establishing station 14+00 from Grippi's monument and projecting the center line to station 30+67 on Dodge's bearings and distances. with the bearings rotated 16°15' right to true meridian. The right-of-way line is then reestablished 30 ft. from and parallel to the center line. Tamalpais Ave. is not constructed in this area." This information was used to establish this portion of Tamalpais Avenue. Without the benefit of Dodge's notes the reconstruction of the middle portion of Tamalpais Avenue was projected using the other recorded Records of Survey through this area (i.e. R-6, R-7 & R-12).
- 7)

A request for Vacation of the entire portion of Tamalpais Avenue running through this site, 60 feet in width, is being filed with the County of Marin. Once completed should there be any questions arising as to the title interest underlying Tamalpais Avenue, a Quiet Title action through the courts or some other appropriate remedy should be pursued to clear that underlying title.
- 8)

None of the record maps identified in the list referenced on Sheet 1 of this map show or establish the northerly line of that portion of Lots 1 and 3, Block 190 as it intersects the northerly line of the subject property, nor do they address that issue. We were able to recover two 2" iron pipes with wooden plugs and brass discs stamped LS 2135 on the final course into the northerly corner of the subject property. The 2 1/2" iron pipe and Brass Cap stamped "TIS R6W AP 195" is stated on the above referenced government field notes as "at the intersection with the bdy. bet. lots 2 and 3, block 190, of the Sausalito Land and Ferry Co. map". Accepting this assertion aligns northerly with the afore mentioned 2" iron pipes with tags LS 2135 (Gordon Voorhies).
- 9)

The found most easterly 3/4" iron pipes with yellow plastic plugs stamped LS 3775, along the northeasterly line shown on R-4 hereon (the Grippi Record of Survey) have other monuments (1/2" iron pipes with wood plugs and brass disc stamped LS 2756) within approximately 1 foot as shown on Detail A on Sheet 8. The surveyor with that license is John W. Page. These monuments do not appear on other record maps that we have uncovered. However John W. Page was a PG & E land surveyor, who also rose to the head of the PG & E survey division and the head of the PG & E Land Department before his retirement. PG & E apparently created the easements for the existing 10 inch gas line that runs through this property. We have been unable to obtain any survey information, data or maps of the work that these monuments are intended to mark. PG & E records are not publicly available. However the gas line easements (1924 OR 197, 1924 OR 200) both call for the Voorhies monuments as shown on said Detail A. Accepting that work completes the reestablishment of the northerly line of that portion of Lots 1 & 2, Block 190, and is coincident with the southwesterly corner of Lot 14 of the "Map of Richardson Highlands, Unit 1" (R-5 hereon). No perimeter monumentation of said Lot 14 appears on the recorded map.
